Mr. Coolidge Rejoices at Germany's Success

By the Associated Press

Washington, Aug. 12 DRESIDENT COOLIDGE in I message of congratulations to President Von Hindenburg of Germany on the seventh anni-versary of the German Republic

"On this anniversary of the birth of the Republic of Germany I extend to Your Excellency on behalf of the Government of the United States, and in my own earnest wishes for the continued

PERMIT REVOKED ON FLOYD STREET, ROXBURY, GARAGE

State Fire Marshal Decrees **Building Unsuitable** for Locality

Declaring that "this is a case where commercialism is on one side and suffering humanity on the other," George C. Neal, state fire marshal, today revoked the license

Henry E. Everett, trustee for the Vincent Memorial Hospital, and Robert W. Means, treasurer of the Trinity Church for the Aged. Mr. Magnet was represented by Martin Hays, as counsel.

ple are from the north of Italy. They are greatly similar, in a number of respects, to the French families who abandoned the land taken up by the Italians and went north to the industrial centers.

Most of these Italians are the sort of people who know how to stand on their own feet. They seem to have a highly individualistic sense—as typical of the pre-war Frenchman—and they set up for themselves. Up to this time there has been no lack of land on which these Italian families may settle, although

mow been occupied. Up to a few months ago it was estimated that in one department of southern France alone there were 2500 abandoned farms and 125,000 acres of land without an occupant.

"Directly opposite the location of the intended garage, on the other side of South Huntington Avenue, is the Boston Nursery for Blind Babies and the Trinity Church Home for the Aged, and nearly opposite on the same street is the New England without an occupant.

Escape from High Taxes
These Italians are genuine settlers.
They come with their families and expect to occome permanent holders of the land they cultivate just as the early settlers who went to America

if a large public garage is erected for the keeping, storage and sale of gasoline and the housing of motor vehicles therein, as set forth in said

license, it would be a discouraging feature in their work and an annoy-ance to the inmates in the bomes. "The directors and managers give

"The directors and managers give their time and energies toward the success of these institutions without any reward. It is meritorious work and they deserve much credit.

"The Vincent Memorial Hospital is governed by a board of 12 trustees and a board of managers consisting of 22 ladies. It occupies a large building, three stories in height, at 125 on the avenue, and maintains 24 beds.

"The licensee claims that such length of time has elapsed since his reception of the permit and license the appellants have lost the opportunity and right of taking an appeal There is no law that governs the length of time after the license has been delivered that an appeal can be taken. It is, to a certain extent, in the discretion of the fire marshal, but it must be taken within a reasonable time and in this case it be-comes a matter of much importance as the licensee has incurred a considerable expense toward the con-struction of the said garage.

Commerce vs. Humanity
"The evidence in this case shows that the appellants did not have any notice or knowledge of the hearing before the street commissioners, although rather obscure notices were published in a newspaper of the time and place of such hearing; and that the appeal was filed July 1, 1926, a month and a half after the permit and license had been received. The month and a half after the permit and ilcense had been received. The work of said garage commenced on June 21, 1926, and on June 24 of the same month Miss Jean Frazier, superintendent of said hospital, a representative of one of the appellants, Mr. Henry C. Everett Jr., was informed that a license had been granted for the erection of a public garage between Basswood and Floyd Streets, and thereafter, within seven days, an appeal was filed with the fire masshal.

"This is one of those cases where commercialism is on one side and suffering humanity is on the other side, but after carefully reviewing all the evidence and making a survey of the location and surroundings of the intended garage, I am convinced:

"It hat the appeal in this case was taken within a reasonable time.

"2. That the keeping, storage and sail of gasoline in a building as set forth in said license would increase to the offensive fomes; be a source of annoyance to the lumates of the adjacent buildings on the avenue, and the offensive fomes; be a source of annoyance to the lumates of the adjacent buildings on the avenue; would be detrimental to the efforts of the officials in behalf of said institutions and against the welfare of the community.

"Therefore, I do thereby revoke the said license granted to Joseph C. Magnet by the said Board of Street Commissioners."

Therefore, I do thereby revoke the said license granted to Joseph C. Magnet by the said Board of Street Commissioners."

Therefore, I do the behalf of said institutions and against the welfare of the community.

AMERICA SEEKS IN POTASH FIELD BY MR. COOLIDGE

Marketers' Head

The co-operative marketing prob-lem for farm crops is receiving re-newed attention from Preside

Turning from a conference on gov-

Institute of Politics Hears President Is Called Farmer's Friend by Fruit Fertilizer Supply Is Now a Foreign Monopoly

WILLIAMSTOWN, Mass., Aug. 12 -United States freedom from the German-Alsatian potash monoply was predicted freely by government officials and individual chemists at the opening of the conference on the mineral raw materials of the fer-tilizer industry at the Institute of

Turning from a conference on government financial policies with Brigadier-General Lord, director of the budget, Mr. Coolidge received Arthur R. Rule of New York City, general manager of the Federated Fruit & Vegetable Growers, Inc., one of the large national co-operative organizations, who later said:

"The farmer has no better friend in the country than the President."

The position of Mr. Coolidge toward the farm co-operative problem, however, was not revealed, although Mr. Rule expressed the conviction the President was favorable to a program for supplying the farmers with adequate credit machinery. Politics.

Virtually all potash received and used in America now comes from a foreign monopoly controlling 95 per cent of the world's consuming demand, it was said, and this monopoly allocates between the French state mines and the German government-controlled mines the \$12,000,000 worth of potash which the United States imports annually.

worth of potash which the United States imports annually. Potash, phosphate and nitrates are the three fundamental necessities for plant growth, it was said. The quickest method of relieving the political dissatisfaction of the "corn belt" and western farmers in the United States, a speaker declared, would be by supplying cheaper ingredients for fertilizers to the farmers in these areas. The future food supply of the Nation and consequently America's population will

kets, the ratio of international sales being in the proportion of 70 per cent for Germany and 30 per cent for France. Thus the situation has reverted to its pre-war status, and we now have France and Germany acting as a monopolistic unit."

German-Alsatian mines produce approximately 35 per cent of the world's present consuming demand for potash, Mr. Concannon sald, amounting to approximately 1,250,000 tons of pure potash per year. From 40 to 50 per cent of this production is exported, of which the United States purchases approximately 60 per cent, making annual imports of about 275,000 tons of pure potash, valued at about \$12,000,000. With more intensive cultivation expected immediately in the United States, the demand will increase. America was cut off from supplies in the World War, and the price soared, he said.

American Supplies Seen

American Supplies Seen J. W. Turrentine, Department of Agriculture, said that the United States has unlimited supplies of its own potash waiting development.

IN INDUSTRIAL AVIATION FIELD

Has 16 Companies Making Machines or Parts With Total Investment of \$5,000,000—Orders of \$5,250,000

DETROIT, Mich., Ang. 12 (Special)

Sixteen companies 'ngaged in manufacturing aircraft or accessories in Detroit, with plant-investments totaling considerably more than \$5,000,000 and with orders on their books to the value of \$5,250,000, according to the estimate of Carl B. Pritache, secretary of the Detroit Aviation Society, indicates the rapid strides taken here in recent months in the aircraft industry.

"Aviation has really become an industry," says William B, Mayo, chief engineer of the Ford Motor Company. Not since 1918 has activity in aeronautics been so great as it is at present in Detroit. And it is re-

ASKS SPECIAL HEARING ON REDISTRICTING

Harold A. J. Oppenheim, who is seeking the nomination for representative to the State Legislature from Ward 21, today sent a letter to Chief Justice Arthur P. Rugg asking that a special sitting of the Supreme Court be called to hear Mr. Oppenheim's petition to have declared null, and void the apportionment of the county into districts. Mr. Oppenheim placed an order in the Supreme Court clerk's office for the immediate printing of the papers necessary.

CO-OPERATIVES' Cotton Growers Call for

Twelve State Associations File Suit With I. C. C. -Group Selling Succeeds

MEMPHIS, Tenn., Aug. 12 (Special)—Co-operative cotton marketing associations put into operation in southern states only five years ago established new records during the season just closed. The 12 state asphis, has proved to be one of the most successful that certain co-operations. PAUL SMITHS, N. Y., Aug. 12 (AP) season just closed. The 12 state associations, including the Long
Staple Association of Mississippi, received 1,453,993 bales, 361,713 more
than the previous season, or 9,3 per
cent of the total crop produced
throughout the South.

Every cotton producing state in the
belt is organized, and the associations are beginning the new year
with membership slightly more than
300,000, all actual dirt farmers who
produce and sell their cotton exclusively through their organizations.

Lower Freight Rates Demanded

Filing of a suit before the Inter-state Commerce Commission by the 12 state associations asking sweep-ing reduction of \$7,000,000 annually Potash, phosphate and nitrales are the three fundamental necessities for plant growth. It was said. The quickest method of relieving, the discussion of the present method of relieving the discussion of the present method of relieving the discussion of the present method of relieving the discussion of the present market in the present of the present market in the present of the present market in the present of the present o

RRUNSWICK, Me., Aug. 12 (P)—Bar Harbor was selected as the next meeting place for the department of many the coast guard in no way, he said.

Mr. Andrews said he will begin at the state convention in session here yestered.

The following delegates were elected to the national convention: H. E. Renedict, Bar Harbor; Frank Elliott, Oakland: Edward Quinn, Portland; John G. Towne, Waterville; Ernest B. Quigley, Eastport; William G. Kirchbaum, Boothbay Harbor; James L. Boyle, Waterville; Charles A. Hale, Westbrook; C. Harold Owen, Milo; Albert Greenlaw, Eastport, and Karl V. Palmer, Woodfords.

GERMANS REGISTER 15 PACTS WITH LEAGUE

GENEVA, Aug. 12 (P)—Germany has registered with the League of Nations 15 treaties, four of which are with Rus its. These include that of April 24 of the present year, which caused a stir as possibly being in conflict with the Locarno Pact.

There also was registered by Germany the treaty of friendship with the United States signed at Washington, Dec. 8, 1923.

NEW VETERANS' HOSPITAL WASHINGTON. Aug. 12 (47)—The general construction contract for the new veterans' heapital near Northport, L. I., has been awarded to Algernon Blair of Montgomery, Ala., on the basis of his hid of \$2,719,956.

CHURCH GROUP'S BOYCOTT FELT IN MEXICO CITY

Government Has No Knowledge of Reported Disorders in State of Michicoan

By the Associated Press MEXICO CITY, Aug. 12-Mayor Arturo Saracho of Mexico City has decreed that the committees placed charge of Roman Catholic churches in the capital may be com-posed of five Roman Catholics and five municipally appointed citizens for each church. Hitherto the com-mitteemen have been all municipal

appointees.
Under the new plan the Roman Catholic committeemen are to have charge of the management of each church, but the municipal commit-teemen will assume responsibility for the property.

Minister of the Interior Tejeda has issued a statement declaring that an interview alleged to have been given to an American newspaper by the Most Rev. Mora y del Rio, Arch-bishop of Mexico, violates the clause in the Mexican Constitution prohibiting clergymen from criticizing the fundamental laws of Mexico or the Mexican Government.

Attorney-General Investigating Therefore, says the statement, the interview "has been cited to the Attorney-General for investigation. This is said to mean that if the At torney-General finds the charges of

brought to Mexico City a report to the effect that two Roman Catholic priests and between 27 and 37 Roman Catholic citizens were executed after an all-day battle between troops and Roman Catholics in the town of Zahuayo, State of Michoa-

The Ministry of the Interior an-nounces that it has no knowledge

of such happenings.

The Government has consistently asserted that the situation throughout the nation has been tranquil out the nation has been tranquil "with the exception of a few minor disturbances." The newspapers have printed little or nothing regarding disorders. Nevertheless Mexico City daily has been filled with rumors of trouble in various parts of the country, but usually the person or persons circulating these has not been able to vouch for them.

Effects of Boycott

The economic boycott continues to depress business, and there seem ingly are no prospects of a recon ciliation of the completely opposed positions of the Roman Catholic episcopate and the Government re garding the new religious regula-It is understood that the commit

tee of financial experts, appointed by Secretary of the Treasury Pani, to study the financial and economic depression, sees little prospect of an nmediate solution.
One of the fundamental difficulties

in the financial situation, from the Mexican point of view, is that Mexico produces so little of what it con-sumes. For example, it imports a large part of the butter, eggs, and foodstuffs used in the country, while potential possibilities for production of such commodities are almost un-limited.

Government officials estimate that government omciais estimate that property valued at more than 25,000,-000 pesos may be seized by the Government if peading "denouncements" of alleged church property are sus-

engaged in airplane manufacture here is the Ford Motor Company. here is the Ford Motor Company, which more than a year ago acquired the patents and rights of the Stout Metal Airplane Company. William B. Stout, designer of the all-metal monoplane, heads the aviation division of the Ford Motor Company at the Dearborn airport, called here the finest in the United States, and the only privately owned one which has a mooring mast capable of holding any dirighle in the world.

only privately owned one which has a mooring mast capable of holding any dirigible in the world.

That aviation has really become an industry with the Ford Motor Company any was acknowledged recently by Mr. Stout, who says:

"The three-engine plane of the Ford Motor Company is now perfected to the point of production. A large factory of the most modern type has been built and is being ecuipped with the latest machinery for this work." One of the finest hangars in the world has been completed at the Dearborn airport and is now occupied by the first of our fleet of tri-motor transports. Others will follow it. We plan it built in the forerunner of the lighter-than air better two companies are at present working on Government contracts. The Aircraft Development Corporation is building an all-metal airship, the first of its kind and one which many aeronautical engineers believe to be the forerunner of the lighter-than air. fected to the point of production. A large factory of the most modern type has been built and is being ecuipped with the latest machinery for this work. One of the finest hangars in the world has been completed at the Dearborn airport and is now occupied by the first of our fleet of tri-motor transports. Others will follow it. We plan to build 100 of these for intercity air line use, just as rapidly as they can be put together."

Mr. Stout declared that the market value of these 100 sirplanes at the most market value of these 100 sirplanes at the most more than the most market value of the most more than the most more than the most more than the most more than the most market value of the most more than the more than the most more than the mor

together."
Mr. Stout declared that the market value of these 100 airplanes at current prices will be \$3,700,000. At present the three Wright Whirlwind motors used on each cost nearly \$15,000. A reduction of cost in fabricating the dural aluminum fuselage and wings wil be possible in mass production, said Mr. Stout, while the Ford plans call for the possible development of their own air-cooled aerial motor at a lower cost than the present master state areas. cost than the present market price

Others Enter the Field In addition to the Ford Motor Com In addition to the Ford Motor Company there are three other airplane factories in production, the Stinson Aircraft Company, whose plant is in Northville, a Detroit suburb; the Buhl-Verville Airplane Company, and the Hess Aircraft Company of Wyandotte, another suburb. A. W. Hess, president, reports his company has president, reports his company has ames Strickland, a commander in the Salvation Army, in which he pointed December.

W. E. Johnson Tells of Nations' Steady March Toward Universal Veto

By Cable from Monitor Bureau LONDON, Aug 11—William E ("Pussyfoot") Johnson, who has just returned from Estonia, where he attended the international conference of the World League Against Alcoholism, is leaving this week for Denmert on an eight day appealing Denmark on an eight-day speaking tour. He sails for America on Aug. 51 on the Leviathan to participate in the September and October antiliquor campaign in California, returning to England in November.

"Ours is not a campain; it is a movement," declared Mr. Johnson to a representative of The Christian Science Monitor at his headquarters in Fleet Street, when asked today about the progress of the campaign in central Europe and America. "Ours is a movement, and it is going on forever. Everywhere the drink traffic is up against it. Every gov-ernment takes upon itself more or less to restrict its drink traffic. From restriction to prohibition is only a step. There are dry scandals in America, of course. There were wet scandals, too.

Prohibition Being Enforced "Prohibition is being enforced, you can take it sure, better than the itcensing law ever was. We have cor-ruption, but less than before. Folks who feel that way howl and how! that people can get all the liquor they want, and liquor producers say they sell more; then what have they got to croak about? When people find that prohibition is a failure they will change to something else.

The opposition talks about a referendum Well every congressional

endum. Well, every congressional electon is a referendum, and we have had three elections in the United had three elections in the United States since the country went dry in May, seven years ago. Every time there was a great hullabaloo by the wets, but the people elected a drier Congress every time. There is just as much chance of the country going back to the old system as there is of its going back to human slavery. Democracy First

"If I had the power to make Engand dry I would not use it," Mr. Johnson emphatically declared. "I believe in democracy, and that any nation should have the laws it wants. If America wants to go back to the old system, let her—and may God have mercy upon her soul. "The World League Against Alco-

holism is getting on. Coming back from America three weeks ago I left from America three weeks ago I left the ship at Bremen and went to Dorpat, Estonia, for a conference. There were nearly 500 delegates there from all over Europe, one from Japan, and half a dozen from Amer-ica, and all told of progress toward achievement by education and legis-lation for the suppression of alco-holism.

"Everywhere there is a distinct tendency toward greater sobriety. There are fewer drunks to be seen in London than in recent years, and it is the same in Scotland, where they have got the veto now. I don't say you cannot in Glasgow see drunks in Argyll Street or Sauchiehall Street, or find people with a thirst going from a dry parish to a westone, just as you can witness a migration any night in London from within the City to jubs that are open half an hour icnger across the boundary; but you have got everywhere a soberer sentiment. It is all a sign that the movement of the World League Against Alcoholism is steadily marching on toward a universal veto, and there is no need to force methods to advance it."

Clubhouse for Former Prisoners | LEAGUE TO SCAN AGAINST DRINK Will Aid Them in 'Going Straight'

New York Center for "Come Backs" Will Be Free to All Willing to Deal "On the Level"

Special from Monitor Bureau NEW YORK-The first service clubhouse of the Marshall Stillman Movement which is designed to be a ploying men sent to them by the or-reconstruction center for men with ganization.

"We are not reformers," Mr. Geer Movement which is designed to be a prison records, will be opened in the fall, according to an announcement

by Alpheus Geer, founder of the organization. The property at No. 290 East Third work has already been started on the building, which will be com-pletely remodeled at an additional cost of about \$50,000, Mr. Geer said

in an interview. It is being financed by Robert Law Jr., a vice-president

of the organization. The clubhouse, which will be lo sections of New York's East Side dis trict, is known as Service Club No. 1 and when completed will include a gymnasium, shower baths, library assembly room, restaurant, commit tee rooms and dormitories. It will be available as a general meeting place for men of the neighborhood without distinction as to their pass or present connections, provided they are recommended by a member of the organization, the object being to give every man a chance to "get started right."

Through its, employment bureau, the men will be assisted in finding work, and a committee composed of Walter N. Polakov, Montgomery Schuyler, Wallace Clark and Charles W. Wood is engaged in making a survey of the various occupations

"The whole idea of the Mar-

lurgy was also represented. It is de-clared that any agreement must re-ceive the approbation of the govern-ments. The matter is too important to be settled privately. Already, ac-cords of a far-reaching character have been concluded, but some of them are contingent on the general understanding which was discussed today.

There must be a systematization of iron production in Europe. Here, however, a danger arises for the con-sumer. Certainly, France is able to produce much more than readily can be absorbed, and Germany might

sumer. Certainly, France is able to produce much more than readily can be absorbed, and Germany might also overproduce. Yet a strict regulation of quantities entirely destroying competition and perhaps artification on the continent, is seen by many people as the forerunner of many people as the forerunner of general economic union of European states. The actual signature at the present juncture is uncertain, but whether there is an exchange of documents or not, the parties are in virtual agreement, though such material circumstances as the flucturating of the franc prevent the elaboration of solid conclusions.

Origin of Cartel

The origin of Cartel

The origin of the projected international cartel is thus explained by a qualified person: "Germany, after the war, found its metallurgical industry diminished. Upper Silesia went to Poland; Lorraine to France, Vollee NEW YORK CITY =

ITALIAN TREATY

the subject of the treaty just signed by the Spanish Government with Italy, explained that it was simply a compact of friendship between the two signatory powers.

Article 13, he said, was the most important of all as it stipulates that Italy and Span undertake to observe reciprocal friendly neutrality in case either enters a conflict with a third power. By another clause, both countries undertake to have recourse New Accord With Spain Said to Be Modeled on Lines of Locarno Pact

By HUGH F. SPENDER By Special Cable

GENEVA, Aug. 12—The new to arbitration should a misunder-reaty between Italy and Spain has standing arise between them.

The genesis of this agreement may not yet been filed at the Secretariat of the League, but the correspondent of The Christian Science Monitor is able to give the following details of its contents. It is modeled on the Pact of Locarno and in its preamble is called a "Treaty of friendship, conciliation and judicial arbitration" between the two countries, the words negotiations which have now led to etween the two countries, the words

sors of the laws, how to reach the "regiamento giudiziario" being used.

The treaty is divided into three parts, dealing with political questions, arbitration and the procedure to be chosen for the settlement of disputes. Article 13 is the most important for it block bette countries. "Our system is preventive, not punitive. We realize that the punipreventive system cannot be con-ducted by public organizations be-cause of the personal element that must enter into it which the State ortant, for it binds both countries to neutrality in the event of one of them being attacked without offering provocation. This clause the League could not possibly give. It must, therefore, be left to private enterwill examine with the greatest care to see that it does not conflict with the obligations of either country under the League Covenant. It is probable, however, that since the treaty is to be deposited with the League and is essentially the same as the treaties which Italy has made with Jugoslavia, Czechoslovakia and Switzerland, it will be found to contain clauses and sequencing the prior our members is that they will deal 'on the level' with us and with other members of the organization, and when we find work for them, they must agree not to 'double-cross' the employer to whom we recommend tain clauses safeguarding the prior rights of the League.

If the League is thus found safeguarded, it will welcome the conclusion of the agreement between these two countries, which is evidently designed to keep peace between them by regulating their difference. in acordance with the spirit of the Covenant. In this way the treaty will, it is hoped, settle the difficult relations of the two countries in North Africa, for it is above all a pact of nonaggression

Both French and British opinion as far as can be ascertained, favor the treaty, but Britain will desire to know that it does not alter the status quo in the Mediterranean or in any way affect its interests. In Spanish circles it is regarded as an official sanction to the improved relations of the two countries arising out of the friendship of the Spanish and Italian kings and King Alfonso's interview with Benito Musolini. There is no doubt it was then that the new agree-

Belmaison's Fascinating Collection of

Reproduction Beds In the Furniture Sale

One must go far to find anything at all comparable to Belmaison's collection of beds, including as it does exact and beautiful reproductions of examples as diverse in style as the Colonial American / A and 17th and 18th Century Spanish . . . Jacobean oak and Chippen-

and Directoire. In this, as in other instances, it

has been our principle to copy only the best. And because these are exact reproductions of actually old pieces they have that rare quality of individuality that one usually associates with antiques alone. In many cases . . . as for example that of the Spanish group . . . they are reproductions of originals which we have had in our own stocks.

Here are the most appealing of high and low post beds for the simple Colonial bedroom. Superb painted and gilded 18th Century Spanish beds, and the 17th Century walnut types with backs of arcaded spindles, for Spanish bedrooms of differing decorative schemes. Queen Anne walnut and Chippendale mahogany examples with their high, gracefully shaped headboards, their air of unapproachable elegance. Italian Louis XVI and Directoire daybeds of unusual decorative merit. Charming Louis XV provincial examples. And quaint Jacobean beds with panelled backs or with the linenfold carving so characteristic of early English design.

LAWCONFERENCE ENDS AT VIENNA

German Chief Justice Says War Enmities Are Vanishing

By Special Cable

VIENNA, Aug. 12—The interna-tional law conference closed yester-day after marking a new era in the development of a peace settlement second only in importance to Lo-carno, because the lawyers of all nations who are returning home will act as missionaries to make the rule of law world-wide.
Dr. Simons, the German Chief Jus-

tice, interviewed by the correspond-ent of The Christian Science Monitor at the conclusion of the sessions, said the most valuable service of the conference was the reunion in close con-tact of the jurists and the gradual disappearance of war enmities. Thus the Portsmouth conference, at which the Germans were barred, and the coolness of their reception at some later conferences by their former oponents were now entirely removed

by Vienna.

Dr. Simons pointed out that the definite results included the Bellot project for an international criminal court, including the added feature of defining the clause of the crimes triable and barring the death sentence for those accused whose states disallow it. Also the Vienna meeting rules that rates of exchange should fix the contract for payments on a

The Ministry of Justice's majestic portals echoed to the strains of modern dance music, and were typical of the entire disappearance of the militarist feeling in the former

Sheshuan's Capture Called Step Toward Pacification

By Special Cable TANGIER, Aug. 12—The retaking of Sheshuan by the Spaniards, as officially announced, marks another step toward pacification of the Riff. It has long been known that a strong column was advancing toward She-shuan with flanking columns for this purpose, and it would seem that the progress has been very slow, but doubtless the great heat now pre-

vailing had been a consideration.
Perhaps another factor was that
no risks could be taken as the
formidable Jaballas were practically all hostile and much opposition was expected. It is reported that re-sistance in this quarter is now def-

initely broken, and the chiefs are in flight, while a considerable quantity of munitions has been captured. Sheshuan is in a most inaccessible country and to prevent their capture last year the Spaniards abandoned it with enormous quantities of supplies. The retreat to inner lines resulted in a rout. Much remains to be done before the country's complete subjec-tion is attained, but roads are being hastily constructed, thereby facili-tating the movement of troops and it is not believed that any combined rising is ever likely to occur again.

CONSPIRACY AGAINST KEMAL PASHA PROBED

President of Court Scathingly Rebukes Djavid Bey

By Special Cable By Special Cable

CONSTANTINOPLE, Aug. 12—
Djavid Bey, Minister of Finance in Izzet Pasha's Cabinet, cross-examined on Tuesday by a tribunal probing a conspiracy against Mustapha Kemal, President of the Turkish Republic, incurred the judge's displeasure by relating that, after the fall of the Cabinet in which he figured and after the formation of Damad Ferid Pasha's Government, he, in order to evade arrest by he, in order to evade arrest by Damad Ferid, remained in hiding for 175 days and subsequently fied the

country.

The president of the court scathingly rebuked him for thus disproving the truth of his now professed allegiance to Kemal instead of doing all possible to help in the struggle for national independence. Djavid

Col. Ned M. Green, a personal problem of these days it will be all he deserves."

LONDON, Aug. 12—Information office of the Leipzig Fair that the will continue in the service.

Col. Ned M. Green, a personal problem of the Leipzig Fair that the will continue in the service.

Col. Ned M. Green, a personal problem of the Leipzig at the end of August. The delegation will consist of 50 members. Government, says the press, has loyaly fulfilled every clause of the peace treaty and met every obligation imposed by the financial committees of its victorious enemies.

Continuing that policy, it says, the Government will undertake to suppressed to the peace of t

press all alleged revolutionary or-ganizations, but since there are hundreds of thousands of Macedonians here this is almost an impossible task. Macedonian leaders are des-perate, it is said, and feel they are with the result that the only important chieftain at large now is El Jeriro, who is a formidable foe and is famous for having emplaced guns to bombard Tetuan.

The latter, together with Ueld Said and El Bakail, who have now surrendered, were a strong combination.

The Spaniards propose to unite intense political activities with a campaign to pacify the district of Senhaya, and Beni Sadat and French columns will co-operate in Uarga.

Washington I said, and leet they are carrying on the same kind of war which resulted in the liberation of Greece, Italy and Ireland. They feel that the suppression of their organization will mean the final partition and subjugation of Macedonia, and that before that takes place many more bombs will be thrown.

Better Distribution Is Need Now, Mr. Jardine Tells New Hampshire Grange

HAMPTON BEACH, N. H., Aug. 12

"Agriculture has made progress to recomparable to the progress in any other industry," said Mr. Jardine.
"The Federal Government and the summ various states have spent millions of dollars to solve the problems of production and marketing, and, as a result, agriculture is 18 per cent more efficient in producing than it

more efficient in producers made in being efficient producers than in the ingreshendising of our products. When agriculture can unite on a legislagiculture ca ing efficient producers and ing efficient producers. When agriculture can unite on a legislative remedy and bring its program to the attention of Congress it will to the attention of Congress it will passed."

Winant, in an address we were also been seen a seen and the seen and

apt to be centered in the products rather than the men who produce them," and he urged that this tend-

ency should be reversed.

Louis J. Taber of Columbus, O., national master of the Grange, advocated the spread of information which would enable better produc-tion and marketing, reduction of taxes by economy in government, and enforcement of the laws designed for

the protection of the farmer.

The program of the day included a parade of decorated floats, a horseshoe tournament, athletic contests and a fireworks display.

PLANS MORE ROOM AT SCOLLAY SQUARE

Transit Commission Seeks Data for New Buildings

In a letter addressed to the Boston Elevated Railway Company, the Boston transit department and the street commission, Frederic H. Fay, chairman of the Boston city planning board, urged that an early under-standing be reached between the company and the transit department regarding the proposed remodeling of the surface buildings of the

Scollay Square subway entrance.

The letter reminded the officials of both road and city that the Legislature had authorized the reconstruction of the surface subway structures so that they be made less of an obstruction to traffic. The legislative act provided for the expenditure of about \$125,000. The transit department prepared

plans to make the Scollay Square Arlington Street and thus give automobiliers an unobstructed view. The exit in Brattle Street was also provided in this plan.

The Elevated trustees believed the proposed entrances not sufficiently ornamental and advocated a covering vide shelter for car passengers. The Elevated officials also believed an-

women prisoners. The Elevated officials also believed another escalator to be necessary.

Special from Monitor Bureau

New York—The standards of outside industry and wase payments are combined for the first time in an area lested to be an actual happening, one which is in the official records.

In the Morgan camp is beautiful, with flowers, green fields and pine groves how being paid to women garment workers in the New York State Reformatory for Women at Bedford, according to Mrs. Sara Comboy, secretic workers of America.

Life for two months is just one day of happiness after another for these boys and girls. Their supervised by an after another for these boys and girls. Their supervised by an after another for these boys and girls. Their supervised by an after another for these boys and girls. Their supervised by an after another for these boys and girls. Their supervised by an actual through questionnaires.

Underlying the zoning movement which there are many, and the computation in its equipment but the power of moral suasion, is the influence are many, and the computation of Boston In March 1762 cerver which who is in the collidary to the benefit of the community at large, and no legal parameter who at first declined to take back him, but the benefit of the community at large and capacity. In April the members of the town, particularly the members of the town power have known and never can have wich the many and the computation of Boston In March 1762 cerver which whose from which which has occupy to the low beamed rooms of

tile Workers of America.

Speaking to the inmames at Bedford, Mrs. Conboy said:

"The garment industry is interested in this experiment, which is operated on the state use basis, be-cause it is a transfer of work for-merly done in men's institutions to a woman's institution where it rightly woman's institution where it rightly belongs. Girls trained in the arment industry can find employment upon release. Men cannot, for the industry outside the prison is operated almost entirely by women."

The Bedford experiment is part of

a survey of industries suitable for women prisoners undertaken by the committee on the care and training of delinquent women and girls of the National Committee on Prisons and Prison Labor. The Union Label Garment Manufacturers' Association and the United Garment Workers of America selected the secretary of a local labor union to direct the

Mrs. Frank B. Gilbreth, well known Mrs. Frank B. Gilbreth, well known woman industrial engineer, has worked on the plan, and while the industry in the beginning is small and the wage to the workers is likewise small, the development of the specifications and samples of goods for the workshop has brought out an entirely new line of model garments for institutional use, so that inmates of other institutions who wear them will be more comfortably clothed as the result of the experiment. Other penal institutions for women throughout the country are using the information developed in the experiment.

N. Y., N. H. & H. WILL OPEN NEW FREIGHT AGENCY

The New York, New Haven & Hart The New York, New Haven & Hartford railroad, recognizing the growing importance of Boston's foreign commerce, and with a desire to contribute to its future development, announces, effective Aug. 15, the opening of a foreign freight traffic agency at Room 301, Boston Grain and Flour Exchange Building, corner of India and Milk Streets. The agency will be under the charge of Fred T. Smith, who has been in the service of the New Haven for 26 years in various capacities in and around Boston.

FARMERS URGED Morgan Memorial Head Plans to Extend Movement Abroad

Dr. Helms Leaves on Tour of 17 Countries After Reception by Children at Summer Camp-30 Establishments in United States

to religious leaders in other conti-

Last night at the Morgan Memorial summer camp in South Athol, Dr. Helms was given a farewell by the 150 children who are spending eight weeks at the 600-acre farm. The occasion also marked the twenty-fifth

underwritten by prominent American

churchmen interested in the project. The farewell by the children was described by Dr. Helms, in his ad-dress to them, as one of the most wonderful experiences of his life. wonderful experiences of his life. These youngsters from the South End of Boston, saving their pennies for weeks, were able with the assistance of adult members of the organization to present a chest of silver to Dr. and Mrs. Helms as an anni

versary gift, Dr. Helms was told last night that the camp workers had raised a large sum of money to finance a project for bottling and selling water from the big spring at the farm. The water will be mixed with light, popu-lar flavors. Several thousand dollars' income annually is expected from the sales, all of which will be used to enlarge the children's camps. This was a surprise announcement to Dr Helms, the plans having been kept secret for months. All who visit the Athol camps are

amazed at the scale on which the staff of 40 leaders conduct this sum-mer vacation movement to bring happiness to children who live in the city and have little, if any, op-portunity for such an experience. The youngest at camp is two and a half years old, and the others range half years old, and the others range set aside for community business or up to 16 years. There are a few olderly women at one rest camp.

Morgan Memorial each year has more than 300 applications from mothers who wish to have their children enjoy the free facilities of the camp for two months. All applications are investigated during the training of the camp for two months. All applications are investigated during the facilities of the camp for two months. temporary injunction against Fred M. Libby and Edward M. Welch, operators of a motor camp at York Harbor with a 500-car capacity, was Winning Wide Trade Demand

Hearing on a petition for the in-junction was held on July 13, after which Justice Sturgis visited the Grovers Study Production Methods—Amateur Growers Study Production Methods-Amateur Gardeners Attaining Remarkable Results

In his presidential address, delivered last evening at the annual meeting of the American Gladiolus Society in Rochester, N. Y., Dr. S. I. Moody of Brockton made important recommendations affecting the commercial aspects of gladiolus culture, and a program of research which will be discussed by growers to gather in Boston Aug. 21 and 22 for the annual show to be held in Horticultural show to be held in Horticultural liall under the joint auspices of the Massachusetts Horticultural Society and the New England Gladiolus Society.

Dr. Moody recommended that a committee be appointed by the society to begin an intensive study of the commercial aspects of gladiolus of the commercial aspects of gladiolus for their product. Apparently the public too has become more accurately informed about the flower and is accumulating specific appreciation of its decorative qualities. Amateur gardeners everywhere have evinced their roll of summer garden flowers and some remarkable results have been noted among small-scale grow-cers.

ciety to begin an intensive study of the commercial aspects of gladiolus culture with a view to stabilizing the industry. He cited the increasing trade demand for superior varieties of gladiolus and the possibility of producing a continuous succession of blooms for year around use. He suggested that a careful an-

He suggested that a careful an-alysis of the situation in which growers now find themselves and some changes in present methods of production be made and, further, that the support of the society be defi-nitely lent to research work on varie-ties and to the encouragement of a symposium on popular types of the flower.

Much Interest Manifest

Mr. Goodwin said that with the was highly improbable. Prof. Duncan operation of the compulsory insur-Hall of Australia took issue with the ance liability law he expects to see a theory that England had feared marked improvement all over the State, but he added that he did not believe that the Massachusetts regis-tration will reach 1,000,000, as that would mean one motor vehicle for every 3½ persons in the State, these figures including children.

AMERICA SEEKS POTASH SUPPLY

Although the German combine seeks to extend the use of its own product, he said that on the whole exorbitant

he said that on the whole exorbitant prices are not charged, although a American consumers believe local supplies could be used-more cheaply considering the transportation factor. To avoid freight rates, domestic potash is likely to be refined to reduce its bulk, Mr. Turrentine said. Potash production, he said, is now a chemical rather than a purely mining operation. Vast potash deposits are believed to crist in Texas. It is possible, he said, that Texas potash brine may be delivered to the Guif of Mexico hy pipe-line, where it will be refined and shipped to interior areas. been noted among small-scale grow-cers.

Although he cannot be counted at all a small-scale grower, the happy results of considerable study of the gladiolus are to be found in the experience had this season by Wendell W. Wyman of Sharon in obtaining a perfect growth of two bulbs of the famous and unusually rare "Purest of all" and "Phanomenom" which he imported in the Spring and of which there are comparatively few examples now known in the United States.

Withdraws From Democratic Nomination Contest-John Hall of West Springfield Decides Not to Enter Lists for Lieutenant-Governor

With the withdrawal of John Hall of West Springfield from the Democratic contest for Lieutenant-Governor nomination, and Theodore A. Glynn of Boston from the Sugoik County Democratic shrievalty nomination contest, matters were beginning today to clear up somewhat in the "muddled" situation which has arisen during the past few days.

Much confusion still exists, but when the final hour for withdrawals is reached at 5 p. m. Friday, political leaders will be able to begin their summer campaigns.

Mr. Hall had filed papers for both may hold up the primaries. The full court some primaries. The full court some questions of law raised.

of the Japanese alliance."
He added, in part: "To summarize, we find that the four-power treaty did away with the English-Japanese alliance and substituted therefore an agreement of non-intervention by England, the United States and Japan, and estab-

lished the status quo, giving the Ja-panese a considerable advantage in the limitation of fortifications, givfirst position, but will continue as a candidate for the Democratic nomi-nation for Congress. He is unop-American Supremacy Checked posed in his party primary, but his Republican opponent in the state election will be Congressman Henry "So that the whole result of the conference was that for the advantage of England the treaty destroyed the threatened American supremacy on the seas and left England as the

L. Bowles of Springfield.

An Important Contest Mr. Glynn has decided to support I shall continue to go forward."

George E. Curran of Boston, member of the Governor's Council, who is Plymouth, Mass., all day today, and Plymouth, Mass., all day today, and leading sea power in merchants and in fleet for it is developing its cruiser class, which the treaty left unlimited. Further, it released her from the of the Governor's Council, who is seeking to be the Democratic nominee for Sheriff in Suffolk County. The contest is one of the most important in the primaries, with a large of the three candidates for the Re-Japanese alliance which Canada would no longer tolerate. With the limitation of armaments the United States consented to the four-power imber of aspirants.

States consented to the tour-power treaty by which Japan is made secure in her status quo on the continent of Asia until Russia offers an objection, or China herself becomes the Denice of Attorney-General Benton.

the name of Mr. Ely on the ballots.

Mr. Dooley charged Mr. Ely did not be trict attorney, has also given out a statement in which he defends his carried and public record. He is Admiral Rodgers' statement was at once challenged by members of the round table. Capt. William W. Smyth, from the Secretary of the Navy's office, said he thought war between the United States and Japan comply with the law relative to nom-inations. If Mr. Dooley persists in his objections, a date for a public

summer campaigns.

Mr. Hall had filed papers for both the Lieutenant-Governor nomination and for Congress in the Second District. He withdrew today for the May Withdraw Objection May Withdraw Objection The attorney may withdraw his objection, according to his statement yesterday: "I intend to conter with the Secretary of State. If after con-ferring with him I find I can still champion the cause of the voters of Ward 21 in Brighton without dis-

publican nomination for Attorney-General, has issued a statement discussing the contest. He called attention to his 25 years as a lawyer and his record as first assistant in the office of Attorney-General Benton. Thomas C. O'Brien of Boston, dis-

seeking both Republican and De hearing will be assigned later.
Political leaders are showing with several opponents.

DODGE JULY SALES MAKE NEW RECORD

First Dealers' Prize Goes to Hyannis Company

Sales records hung up by New England automobile dealers of the Dodge Brothers organization during July have proved that motorcar sell July have proved that motorcar seling is not a seasonal occupation, H. J. Koch, advertising director of Dodge Brothers, Inc., told the dealers of the Boston district, which includes most of New England, at a dinner at the Hotel Lenox yesterday in which the car retailers were guests of H. D. Day, district repre-sentative of the Dodge Brothers com-

deliveries of 41,300 Dodge cars in New England broke all records of the organization here and placed the terms from contractors for laying Boston district second only to the San Francisco district in the percentage by which it exceeded its allotted quots. He added that a gratifying feature of the month was that dealers' stocks of used cars showed practically no increase at the end practically no increase at the end

of the campaign.

Mr. Day awarded prizes to the Mr. Day awarded prizes to the leading dealers in the July sales contest. The first prize went to the Hyannis Auto Sales Company, W. P. Hamblin, proprietor, whose leading salesman, M. E. Sullivan, delivered 77 new cars during the month. Second prize was taken by the City Garage & Sales Company of Pittsfield, Mass., and third to the Gardiner Motor Company of Gardiner, Me.

STATE PATROL BACK WITH DRILL TROPHY

Captain Beaupre and 14 Men of Squad Are Welcomed

Capt. Charles T. Beaupre, commanding the Massachusetts State patrol and 14 of the 20 picked men who successfully competed in the exhibition drills of state constabulary

PLAYING FIELDS GROW IN FAVOR

Association Formed a Year Ago Reports Increase in British Grounds

Special from Monitor Bureau LONDON-Much good spadework has been done since the inauguration of the National Playing Fields Association just a year ago. This association has been formed to arouse and educate public opinion to help Mr. Koch said that the July total schemes for acquiring public recreaterms from contractors for laying out grounds; to secure the tenure of occupation of grounds already held; and to assist local authorities with advice and information. Seven number will have been increased to 30 by the end of this year, and by April, 1927, will include every county in England. Work will then start on

such Scottish and Weish counties as have not already made a beginning. Figures which have been collected by A. N. Hutt, the enthusiastic sec-retary of the association, disclose what a terrible state of apathy has what a terrible state of apathy has reigned on this subject, though there are brilliant exceptions where foresight and a progressive policy have made headway. The figures range from a medium-sized town on the coast which can only boast of one hard tennis court for public use, to Manchester with its 1615 acres of open space of which about half is devoted to recreation. This is found in 156 public football grounds, 83 cricket pitches, 23 hockey grounds, 115 grass tennis courts, 303 hard tennis courts, 71 bowling greens, nine golf putting greens, and 44 children's playgrounds.

Talking of these playgrounds, Mr.

successfully competed in the exhithion drilis of state constabulary
units at the Sesquicentennial exposition in Philadelphia last week returned to Boston today. They arrived at South Boston on board the
S. S. Nantucket of the Merchants &
Miner's Line where they were met
thy Col. Alfred F. Foote. commissioner of public aafety for Massachusetts and Dr. Edward Ryan. The
party was conveyed in a feet of private motors from the dock to the
State House.

Captain Beaupre was the proud
bearer of the sliver cup won by his
unit in the dismounting and cavalry
drill for skill in which event the men
competing were awarded individual
medials by the Sesquicentennial offirials. The cup, which is beautifully
sugraved, stands about a foot and a
half hish and is lined with gold.

The honors won by the Massachussetts unit are considered especially
notable insamuch as the period of
training was comparatively brief and
the men lack in Massachusetts conditions of cervice to give them the
degree of experience with horses had
by many of the constabulary units
dependent eatirely upon such means
for their patrol.

A guiding sign for aviators en route to Boston is being painted on the roof of the Waltham watch factory in Waltham by order of the Chamber of Commerce of that city. The name Waltham and an arrow pointing in a southeast direction toward Boston will be lettered 12 feet long. The sign will be placed so as to be read from the west side.

CALIFORNIA HAS FOUR STARS LEFT

Bell's Form Is Greatly Improved, Dfeats Hill 6-1, 6-2 Junior Doubles Start

Special from Monitor Bureau CHICAGO, Aug. 12-Four Californians entered the quarter-final jumor singles against an equal number from the annual juniors' and boys' championship tournament of the United States Lawn Tennis Association at the South Side Tennis Club courts. Two of the Pacific coast stars, however, face each other, and the other two anticipate strenuous battles with leaders from other sections

south Sade Tennis Club courts. Iwo of the Pacific coast stars, however, face each other, and the other two anticipate strenuous battles with leaders from other sections.

John M. Doeg of Santa Monica, a favorite for the title, meets Dolf Muehleisen of San Diego at the top of the bracket. Doeg yesterday made easy work of Joseph T. Smith of St. Louis, 6—3, 6—4, while Muehleisen likewise defeated Howard V. Langlie of Seattle, 6—3, 6—2. The winner of this match may meet another Californian in the semifinals, provising B. F. Gorchakoff of Los Angeles survives his engagement today with E. J. Pare of Chicago, a favorite.

In the feature of yesterday's singles, Gorchakoff displayed a masterly brand of steadiness after the first set. He defeated L. J. Quick of Dallas, Tex. 3—6, 6—2, 8—1. Quick surprised the gallery by his showing in the first set. Gorchakoff fed his backhand, but Quick shot the ball back with such pace that the Californian was passed at the net as though he could not see the ball. In the second set. Gorchakoff steadied, kept away from the net and finally wore the Texan down by long driving rallies from the base line. Pare's play improved markedly in his singles victory, 7—5, 6—4, over Edward Jacobs of Baltimore. The Chicagan proved almost invincible at the net and his service was hard to handle. He will need more steadiness against Gorchakoff today, however.

The other Californian is at the bottom of the bracket, Robert F. Seller of San Francisco, facing D. S. Strachan of Germantown, Pa. Leaning his entire body-weight into his drives. Seller made Gustav Feuer of Miami, Fla., run all over the court in futile efforts at returns, winning by a score of 6—2, 6—3. The winner of the Seller-Strachan match is to face the victor of the Berkeley R. Bell-Julius Seligson encounter. Seligson is a New York Junior.

Bell, who comes from Austin, Tex., was expected to get a real test from

or the Berkely R. Bell-Junior.

Bell, who comes from Austin, Tex., was expected to get a real test from Malcolm T. Hill of Waban, Mass. in yesterday's fourth-round engagement. The score of 6—1, 6—2, however, shows how one-sided it turned out to be. Mixing drives and chops, and working his way to the net with clever strategy. Bell made short work of the first set. In the second, his service became so severe that Hill was unable to get his racket on it half the time. Bell's sterling play, showing a striking advance over his form of a year ago, was the subject of a great deal of comment. No boys' singles will be held today. Those who survived the quarter finats were W. F. Coen Jr. of Kansas City, Keith E. Gledhill of Los Angeles, Sidney B, Wood of Forest Hils, and W. L. Uloughlin of Pittsburgh. The summary:

JUNIOR SINGLES-Fourth Round Julius Seligson, New York, defeated Arthur Kussman, Los Angeles, 6-4, 6-1. E. J. Pare, Chicago, defeated Edward Jacobs, Baltimore, 7-5, 6-4. D. S. Strachan, Germantown, Pa., defeated H. H. Bancroft, San Diego, 3-6, 6-0, 6-3.

feated H. H. Bancrott San Diego, 3—9, 6—0, 6—3. J. M. Doeg, Santa Monica, defeated J. T. Smith, St. Louis, 6—2, 6—4. B. A. Bell, Austin, defeated M. T. Hill, Waban, Mass., 6—1, 6—2. R. F. Seller, San Francisco, defeated Gustav Feuer, Miami, 6—2, 6—3. Dolf Muehlelsen, San Diego, defeated H. V. Langlle, Seattle, 6—3, 6—2. B. F. Gorchakoff, Los Angeles, defeated L. J. Quick, Dallas, 3—6, 6—2, 6—1.

JUNIOR DOUBLES-First Round B. M. Grant, Atlanta, and Donald ram, Nashville, Tenn., defeated Lloyd Vallace, Elkhart, and Charles Miller, etroit, 6-4, 6-4.

Only One Outsider Left in Junior Golf

Special from Monitor Burban
CHICAGO, Aug. 12—Half of the field in the quarter-finals today for the junior golf championship of the Western Golf Association at Edgewater Golf Club are Chicago boys. The other four are Illinois boys with the exception of A. C. Carrick of Toronto, Can., brother of the Canadian amateur champion.
Favorites for the crown fell in the two rounds of match-play yesterday. Donald D. Carrick, the Canadian amateur titleholder, was eliminated in the first round by Samuel Alpert of Chicago, preparatory school champion of this city, 1 up in 19 holes. Alpert reached the advanced round by defeating John Verbos of Kenosha, Wis, 1 up. The Chicagoan today meets John Lanphier of Springfield, Ill.
Thomas Cooley of Kankakee, Ili., who today meets R. C. Mullin of Chicago, yesterday defeated Bibson Dunap, Maywood, Ill., 1 up, after Dunlap had eliminated the medalist of the tourney, Arthur Tveraa of Minneapills, 3 and 2. The surviving Carrick meets Francis Clary of Chicago. The ther match opposes Richard Martin of Chicago and Lawrence Moller of Quincy, Ill. The latter defeated Raymond Koopman of Chicago, 3 and 2, in the first round, and William Mason of La Salle, Ill., by the same count in the second.

OHIO GOVERNOR WILL BE A DRY

Candidates of Both Parties tending northwest. Yet this part of the city to the for Prohibition-Woman Judge's Record Praised

COLUMBUS, O., Aug. 12 (Special) - Meyers Y. Cooper, Cincinnati business man and "preferred" candidate of the Anti-Saloon League, won the Republican nomination for Governor of Ohlo over Thad H. Brown, Secretary of State and rated "unsatisfactory" to the drys. his nearest opponent in a field of 12 conthis week's primary. Mr. Brown held the lead at first but conceded a Cooper victory when returns from Hamilton County, (Cincinnati) began to pour in.

Both nominees for Governor, who will face each other at the Novemer elections are drys, A. Vic Don,ahey, the Democratic incumbent, winning an easy primary victory. Late returns also indicate that dry candidates for Congressional seat won generally throughout "he state, ing re-election or new aspirants for

Mr. Pomerene's Nomination

In nominating Atlee Pomerene, called "unsatisfactory" by the Anti-Saloon League, for the United States Senate to contest the seat now held by Frank B. Willis (R.), a dry, the nocratic Party by no means designated itself wet.

Not only did it give an overwhelming majority to Governor Donahey, a stalwart dry, for renomination, over two opponents both of whom were termed "unsatisfactory" by the Anti-Saloon League but also in the con-gressional districts no partiality was shown to the wets.

In the twelfth district, Columbus, for example. Hub Atkinson defeated his opponent, Ernest A. Young, on the Democratic ticket. Mr. Atkinson stood on a dry plank while his opponent ran on a modification plat-form. Mr. Atkinson polled nearly two to one over Mr. Young, but this was not due entirely to dry influence, Mr. Atkinson baying policy Atkinson having achieved considerable popularity in the State Legislature, where he was minority floor leader for a term. John C. Speaks, incumbent, was unopposed on the Republican ticket, and is a dry.

Judge Allen Ran Well

In a resume of the primary, con-sensus among political observers was that no other Democrat in the State could have opposed so strongly Atlee Pomerene as did Judge Florence E. Allen, who gave him a strenuous race for Democratic senatorial nomi-nation. Mr. Pomerene's vote from available returns was approximately 80,000 as compared with 64,000 for Judge Allen.

"The Democrats think as much of Judge Allen in defeat as they would have done in victory," said Thomas E. Dye, chairman of the State Democratic Eexecutive Committee. "No other Democrat could have made the noted for its roses. Apartment houses are few and small. For the most part the streets are lined with WILL BE SUPERVISE race against Senator Pomerene that she made. Her campaign was dig-nified and that had a strong appeal. private houses, modest in character but well kept up. The northwest colud take its vacation here, have a I believe she could have any office in the State the Democrats had in their restful time and it would never be found out that it had not left Wash-

honor to give."
. The City Planning Amendment the Constitution was rejected by a decisive majority. Most of the cities voted in favor of the proposal but Few who find pleasure in the suc-cessful planting of plants and shrubs in the parks of Washington have ever heard of William A. Frederick, the landscape architect of the capital. smaller towns and rural counties returned heavy majorities against it. The amendment would have permitted cities to assess the entire cost of acquiring property for municipa improvements against the benefited property. Present provision in the Constitution limits the amount of

Improvements against the benefited property. Present provision in the Constitution limits the amount of such costs that can be assessed to 50 per cent.

Mr. Black Leads in Alabama BIRMINGHAM, Ala, Aug. 12 (P)—With two-thirds of the vote polled in the Democratic primary tabulated, Hugo L. Black of Birmingham continued to lead the field in the race for United States Senator Oscar W. Underwood's seat. The vote in 1165 precincts gave him a 15,000 lead over John H. Bankhead. James J. Mayfield, Thomas E. Kilby and L. B. Mosgrove, trailed in the order named. Bibb Graves, on late returns was adding slightly to his lead for the nomination of governor. Mr. Graves' vote was 42,800; Charles S. McDowell Jr. 39,110; A. H. Carmichael 37,112 and A. G. Patterson 31,600.

OMAHA, Neb., Aug. 12 (P)—Gov. Adam McMullen has won the Repub-lican renomination by an overwhelm-

ing majority in yesterday's primary. Charles W. Bryan, formerly Governor and Democratic vice-presidential candidate in 1924, was unopposed for the Democratic nomination.

Summer Time in Washington

LTHOUGH their number is A greatly reduced, there are still sightseers in Washington. The A sightseers in Washington. The Capitol well repays a visit in its vacant days. There is an added dignity, an impression of its purpose in its lofty apartments and the long corridors void of persons. Two women who had been wandering about started toward the Senate office building from the Capitol. "I wish we could have seen a Senator," one of them remarked. "I believe there is one," she added, catching her companion by the arm. A large figure was bending over putting a nenny into a slot and taking out a tabloid newspaper.

It was a Senator. As he straightened up, it proved to be none other than J. Thomas Hedin of Alabama in a paim beach suit, wide brimmed white hat and conspicuous black ribbon crossing his shirt front.

"He must be a Senator," the ladies arread, but it was their loss that they were unable to identify him. They will carry back home with them a

picture of him as typically representing the Senate in summer time

Beyond the Capitol there lies a large residential section of the city unknown to the thousands who jourdaily toward the constantly ex-

east of the Capitol, on a level pla-teau was expected by George Washington to become the main part of the capital and his heirs had large holdings here. What is now the fashionable and popular section was largely swampy ground.

It is much cheaper to live east of

the Capitol. Lawrence Washington, last of the Washingtons to be born at Mount Vernon, and for many years connected with the Library of years connected with the Library of Congress, told the writer that he slept better for living on the off-side of Washington. Here in a quiet street he dwelt comfortably on his modest salary from the Government, reared a large family and sent his construction.

I used to think the butcher shop was the best place in town but lately the Boss has been taking me to a

has been taking me to a dandy place on Cherry street

Then we sit down and pretty soon the man brings the Boss his chocolate nut sundae

Among men of his own profession, however, he is favorably known, and has just been sent for to go to Nassau to repair some of the damage

The first of these two programs will be given at the Sylvan Thea-ter in the Washington Monument

Grounds. It will begin with a march from Mexico, and end with one from Colombia, Brazil, Cuba, Peru, Argen-tina, Venezuela, Bolivia, Chile, Guate-mala, Dominican Republic, and

mala, Dominican Republic, and Ecuador.

The new commissioner for the district, Proctor L. Dougherty, has walked right into public favor. He is straightforward and bespeaks confidence. He is a Boston man but has lived in Washington the necessary 10 years. At a luncheon given in his honor by the Washington alumni of the Massachusetts Institute of Technology, of which he is a graduate he stressed the importance of having more men with engineering training in the public service. In this he is in accord with Herbert Hoover.

hens took him to their hearts and regarded him as one of the family.

When Uncle Bob went, twice a day, to feed his hens, he took milk and scraps for Tommy, and Tommy loved him dearly.

When Tommy grew older he began to take rambles by himself, but if anyone tried to stroke him he was off and away with a flash of gray fur and a fast beating heart, for he had never Known a single person except and a fast beating heart, for he had never known a single person except Uncle Bob, and he had never been into a house, though there were houses quite close to the plot. When two of the hens brought out broods of little yellow chickens Tommy took them under his care, stepping carefully in and out among them, and letting them trip over him as he lay down. So Tommy lived happily with his feathered family for about two years.

Then something happened which made Uncle Bob obliged to give up his hens. He sold them and took Tommy home. But Tommy was frightened of everyone, of the unusual sounds, of the four close walls of the kitchen, and he found his way back to the hen-run and sat sad and miserable, his heart aching for his beloved family.

and miserable, his heart aching for his beloved family.

Uncle Bob took Tommy home again and again, but he would not stay. So at last Uncle Bob asked the people at the nearest house to put out milk and scraps for him. This they did, but nothing would induce Tommy to go near anyone or to enter a door, and so he lived like a hermit. Then one day in his wanderings Tommy heard a sound he loved. It was the proud joyous cackling of a hen which had just laid an egg. Tommy wriggled under a garden fence and found a hen-run filled with strutting cackling hens. He did not hesitate, but went straight to it, examined the wirenetting, and in a moment was over the top.

netting, and in a moment was over the top.

The hens scattered, screaming and clucking, though Tommy tried to tell them that he was their friend and wanted to love them. The master of the house came out and tried to drive the cat away, but Tommy refused to be driven. He was terrified of people, but his beloved hens were more to him than all the people in the world. So he stayed, and by the end of the day the hens and begun

LONDONERS STUDY **AMERICA'S STORES**

Party From Selfridges See New York Methods

Special from Monitor Bureau NEW YORK—Fifty "merchant adventurers," employees of Selfridge's in London, are in New York studying the American retail business looking for new selling methods, exchanging opinions about store adver-tising and describing the whole experience as a vacation.

They are here, partly through the generosity of H. Gordon Selfridge, head of the store in which they are employed. Each one has had his vaca employed. Each one has had his vacation extended to one month this year and been given \$125 toward expenses by Mr. Selfridge, who was at one time manager of the Marshall Field store in Chicago, said H. Seal, chairman of the party and display manager of the Selfridge store, in an interview.

"Mr. Selfridge is a great admirer of the stores of this country and is cor-

the stores of this country and is cor-dially supporting the plan for his employees' visiting them." Mr. Seal declared. "His offer was open to anyone of the 5000 employees. When it was announced that we could book passage on one of the liners carrying the new tourist third-class, 50 of us, including department heads, buyers and salesgiris, took advantage of it. Mr. Selfridge, in some instances. loaned the entire amount necessary for the trip and offered extremely easy terms of payment to those who

"One of your large department stores offered us the very hospitality of the sort that will help us the most. Each of our buyers, for instance, was

Each of our buyers, for instance, was met by a buyer from a corresponding department here and was shown and told the things in which he is most interested."

Mr. Seal said that since the strike in England, business in the Selfridge stors had notably increased. He declared this was due, in great part, he believed, to the added btress on "long range advertising" methods which, he explained, were employed to introduce and popularize the store as a whole rather than specific goods. The Selfridge party will remain in New York a few days, and will go from here to Philadelphia, Chicago, Detroit, and a few to Toronto.

HABERDASHERY for the VACATION

One day in midsummer as the young man was resting on his plow, thinking, he shrugged his shoulders with a determined air. He had seen that although there was now suffi-cient to hire someone to care for the ranch during the coming season, there was not enough to send him back to college.

As he commenced to plow, his little sister came running up to him with an official-looking envelope in her hand. He tore it open eagerly, bewildered, and read with eyes that were a bit misty a piece of informa-tion that he had hardly dared to hope would come true. He had won a scholarship for the coming year.

RESTORING SEVERAL

Architecture—Art—Theaters—Musical Events

Vienna Baroque

imagination and inspiration. How he arrived at his zenith is documented Special Correspondence F LATE much interest has been F LATE much interest has been shown in Vienna baroque, a style of architecture till now style of architecture till now almost completely disregarded. And yet it should have its place in the history of architecture. Its neglect has been due to the fact that this style has been little understood because the history of the time which saw its rise has failed to arouse sufficient interest. Hence writers on ficient interest. Hence writers on this subject failed to comprehend that Vienna baroque was the expres-sion of an ecstasy of gayety consequent upon the delivery of the city from all fears of the Turks, who twice had encamped around her very

Vienna baroque is pre-eminent in Vienna's churches and palaces. The names of three men are connected with its history: First, Johann Bern-hard Fischer von Erlach, then Lukas von Hildebrandt, and in a lesser degree Domenico Martínelli, an Italian. A fourth name might be added, Josef Emanuel Fischer von Erlach, son of the first mentioned. His work, however, consisted chiefly in carryhis illustrious father's proj-

out his illustrious father's projects after his passing.

Johann Bernhard Fischer (von Erlach after he had been ennobled by Emperor Charles VI.) was born in 1665. It is not known where he by Emperor Charles VI.) was born in 1665. It is not known where he was educated, but we find him at an early age in Rome and in Naples, where he is said to have studied under the Tyrolese architect. Philip Schor. About 1690 he removed to Vienna, where he thenceforth resided. In Vienna the edifices erected the store of the shows the influence of impressions made upon him in his early youth at Genoa, so that he derives from both Italian and French styles. In Vienna the edifices erected by this architect everywhere meet the eye. He built churches, pal-aces and mansions; the noble church St. Carlo Barromeo, the Im-perial Library, the Schwarzenberg palace, the palace of Prince Eupalace, the palace of Prince Eugene of Savoy (now the Ministry of Finance), and numerous other of Finance), and numerous other mansions. Even to mention a few of his great works would take more space than can be allowed here. Lady Vienna, whose fine portal is a source Mary Wortley Montagu, who was in Vienna in 1716, bears testimony to their wonderful beauty in a letter to her sister, the Countess of Mar. "The streets are very close," she says, "and so narrow that one cannot observe the fine fronts to the palaces,

ers and masons. These were mostly men of Italian birth, who, seeking wider fields arrived in Vienna and other great cities of the Continent where they worked and left large families who followed in their foot-Von Erlach's contemporary, Lukas von Hildebrendt, was the son of German parents settled in Genoa. He was born in 1668. Nothing much is known of his earlier years nor of where he was educated. Certain it is, a military engineer and served in two campaigns under Prince Eugene of Savoy, who cherished him as a friend. He had a predilection for the French style in architecture, that is, the French classical. His friendship with the Savoyan prince resulted in his building the Palace of Belvedere

His work is more pompous than that of Fischer von Erlach; it is rich in sculptural ornamentation and at times overladen. The Belvedere, how-ever, is remarkable for its architectural proportions and the calm dig-nity of its design. In this palace we see the culmination of Hildtbrandt's operas of Verdi, "Aida" and "Fal-The third in this trio of architects,

Domenico Martinelli, was born at Lucca in 1650. When he first came to Vienna we do not know, but when though many of them well deserve observation, being magnificent. They are built of fine white stone and are excessive high. I never saw a place so delightful as the Faubour of Vienna. It is very large and almost wholly composed of delicious palaces."

The first two collections still exist in the places."

To Vienna we do not know, but when he retired from active life he withdrew to his native city of Lucca. It is interesting to know that he built palaces for the great collectors of works of art, Count Harrach, Prince Lichtenstein and Baron Fried. The first two collections still exist in the places." In observing the architecture of Fischer von Erlach one is struck by the richness of his fancy and the storehouse of his intellect. His artistic vision was vast. In his early period he was much influenced by the Italians Barromino and Bernini. From Italy he brought the dome, which ever since has been conspicuous in Austrian architecture. Later he escaped from them entirely and designed with the great freedom of

"Falstaff" in English by Cincinnati Zoo Opera

CINCINNATI, Aug. 3 (Special Correspondence) -The seventh week of the Cincinnati Zoo opera season was marked by the production of two staff." Isaac Van Grove conducted, and particularly in the latter opera was the recipient of such plaudits as attested the appreciation of his audi-tors for his thorough musicianship. "Alda" drew larger audiences and

more popular acclaim, but the more complex opera attracted the no-tice of musicians and critics on account of the unusual smoothness of production. It was said to be the first time "Falstaff" had been sung in English in the United States. Robert Ringling, who had the title rôle, was the only singer who had been routined in the opera, and few of the orchestra had previously

In the light of those circumstances the fluent production was a technical as well as a musical triumph. There was not a prompt, throughout, and the exactitude with which cues were taken up, as well as the accuracy of the singing of the fugue in the final act have abundant witness to the act, bore abundant witness to the thorough schooling of the cast.

Ringling's singing is extremely flexible, and his phrasing artistic-lis acting of the part was, if any-thing, too reserved to fulfill all the thing, too reserved to fulfill all the traditions of the character. In the supporting cast were quite a number of able vocalists, Mabel Sherwood, Joan Ruth, Kathryn Browne, Themy Goergi, and Ernest Torti. The comedy aspects of the opera were lightened by the amusing antics of Leon Braude of the Chicago Opera Company.

Fred Patton, popular in concert and oratorio, was the Amonasco, and was well received. The cast also in-cluded Italo Picchi, as Ramãs, Ernest Davis as Rhadames, and Herbert

East Gloucester Studio Shows

Gloucester, Mass., Aug. 7 TUDIO exhibitions have become more and more of the painters are throwing open their studios to the public. It is always interesting to catch these glimpses of artist life and see the processes of picture making in preliminary sketches, pencil drawings of compositions and color combinations seldom seen in large exhibitions. One finds in them

on the whole works of an intimate character, the subjects of which are mostly suggested by the much-painted but quite inexhaustible charms of the New England coast.

Among those who are exhibiting at the Reed Studios is Frederick J. Multhe Reed Studios is Frederick J. Mulhaupt, whose shows are becoming annual events in the neighborhood. Mr. Mulhaupt's art appears to have grown during the last year, for his new canvases have a snap and go that one sometimes missed in his earlier work. The canvas, "The Promise of Tomorrow," is an ambitious composition with its lines of rolling surf and sunlit rocks tied together with the prismatic ribbon of a rainbow. There are some lovely snowy landscapes that are exhilarating on these August days—"Signs of Spring" with its opalescent pool, a woodland scene, "Flickering Lights and Shadows," and "Pool in Winter," with its snow-laden hemlocks. One lingers before a small eanvas, to Magdalene Bay, where the base for photography has been erected. Re-sults thus far are reported to be highly satisfactory. Motion picture shows in German

docks that one finds the greatest pleasure.

Up short flights of winding stairs, one comes to the studio of A. Conway Peyton and Bertha Menzier Peyton, where are hung paintings by both and Mr. Peyton's etchings. This phase of Mr. Peyton's etchings. This phase of Mr. Peyton's art deserves special and individual comment. There is so much suggested in these charming things and such delightful humor depicted that one stands long before them. The absurd dignity of the "Penguins" in a beautifully etched plate is irresistible, and in contrast there is the fantastic "A Jungle Sprite," with lovely lines and graceful composition. Careful study of animals is shown in "An Argument" between two bison and "Lab during the study of horses."

Balfour Gardiner's "Shepherd Fennel's Dance," the "St. Paul" Suite by Holst, the Sea Suite by Frank Pholst, the Sir Henry was presented with a lauref wreath as a parting gift the audience called out its approval of him and he was forced to return to the stage many times to return to the s

| There are some local subjects, such Special Correspondence
TUDIO exhibitions have become
quite an important feature of
the art life of East Gloucester,
full blacks and grays. Mr. Peyton shows also some atmospheric studies of the sea in which lines of foam playing over translucent water form with rocks, fantastic compositions of great beauty. Most of these are charming small things with broad

simple masses of color.

Mrs. Peyton works in gayer colors and in more broken masses. Her "Drying Sails," contrasting the white "Drying Sais," contrasting the white of the sails with deep shadows, is a good composition of a fishing boat drawn up near the shore, with dories in the foreground. "A Garden by the Sea" is gay with rose-covered arbors and masses of flowers. There is good quality of the freshness of spring in her "Hazy Day." The white of the houses and the blossoming trees form a lovely harmony of color. The large canvas, "The City Ugon the Hill," is a view of Gloucester's clustered houses with boats in the foreground. Besides these, good still lifes appear in Mrs, Peyton's deftly painted and charming flower groups.

Sir Henry Wood Closes Hollywood Bowl Series

LOS ANGELES, Calif. (Special Correspondence)-Sir Henry Wood and Shadows," and "Pool in Winter," with its anow-laden hemiocks. One lingers before a small sanvas, "Beached for the Winter," with its white snow, deep blue water and its gem-like spots of gay color in the distance.

A glance at Vera Owen's Studio shows her to be a promising pupil of Mr. Mulhaupt. Her subjects are much the same as his—mostly wbarf scenes in Gloucester, some of which are delightful in color. "December Day" is a good composition of boats and "Boats at Dock" is a fine arrangement in blue, green and black. Her studies of autumn woods are rich and warm in color. It is, how, ever, in her pencil drawings of the docks that one finds the greatest pleasure.

Up short flights of winding stairs, one comes to the studio of A. Conway Peyton and Bertha Menusler Peyton, where are hung paintings by both and Mr. Peyton's art deserves special and individual comment. There is so much suggested in these charming things and such delightful of London has concluded his second

In Full Swing August Sales of Furniture August Sales of Furs.

In almost every city one may see emblazoned in the windows of stores-"August Furniture Sale" and "August Fur Sale." These two sales have become national institutions. They present opportunities which attract millions of buyers.

Haven't you been wishing for a new chair, a new dresser, or a modern living room suite? This is a time to satisfy your desire at a considerable saving. If daughter says "I would like to have a fur coat for next winter," or if you want a coat in the latest mode—why not take advantage of the saving opportunities of the August Fur

The Good, Grumbling Poet

TOHN GOWER, the contemporary also the fact that his fame reached with whom he found fault for leaving skewers in the beef-joint to dull the blade of the Poet's carving-knife!

Instead of calling Gower a grumnounced man, intolerant of condiwell. He was a man of independent opinions, which he expressed in no half-hearted manner. So far as the patience of Socrates was concerned, John Gower said quite plainly that he had no patience with it; that he thought it overstrained; and as for him, he had no intention of limitating He appears to have stuck to that

Gower intensely opposed war, in a warlike age; and he did not hest-tate to draw a heavy line between the debased, so-called chivalry of his day that he seemed, in his later writing, unable to tolerate "lollardie," as he

The Poet was a man of upright, if somewhat downright, character, and thought far in advance of many of his countrymen. An Totalian states in the prologue, at the request his countrymen. An Englishman, of King Richard: living in the thirteen-hundreds, he could scarcely avoid believing in gra-dations of human society; but he was liberal for his day in emphatically and constantly declaring the equality of all men before God; and "he re-fused absolutely to admit the acci-dent of birth as constituting any claim whatever to 'gentilesse.'" He came from a good Kentish family, and acquired a fair property, but, unlike Chaucer, he was not appointed to high offices, and his way was far from smooth from smooth.

Gower was endowed with the gift

of story-telling—and six hundred years ago people liked stories—and to this gift was due his success. Although he lacked the humor and dramatic power of Chaucer, refer-ences to him in the fifteenth and sixteenth centuries place him side by side with Chaucer and Lydgate. The numerous manuscripts of his writings indicate Gower's popularity;

hand, but no word, she turned, two followed till she paused be-a according by a ladder to the

storey is between twelve and fifteen test high, and had originally to openings cave trap doors on its top.

The Acomas therefore enter their houses by ladders from the ground to the second storey, but the third storey and the roofs are reached by steep and narrow steps on the division walls.

Within the houses you will find an open hearth for warmth and cooking. In most houses there will be at one and three corn-grinding troughs (metatas) aloping like a wash-board in a tub. Kneeling behind them, a woman will use a small bovelled sinb of stone or lave, of the same material as the trough, with which she crushes the grain, which then fails over the edge between the slabs, each trough making the meal finer than the one before. It has been noted ever since Cantaleda's day, that, if not observed by strangers, the woman always sing at their grinding. For

The Triumph of Righteousness

fill'd"

hered to by some of the finest mentalities in every age, there has developed a moral conaciousness in the world, which is probably stronger now than at any time in the history of mankind. One has only to watch in current events the unfolding of a progressive idea, and its support by those who are working for the betterment of conditions, to realise that such movements are encouraged by a large body of public opinion.

While it might seem that the "great red dragon" is busy making war against righteousness, and that there seem to be many who allow themselves to be used as instruments for the expression of its animosity, yet those who make war against a righteous cause today have to cloak themselves in a less obvious rôle in order to get past a higher world sense of moral order. Evil is forced to adopt more subtle methods in order to deceive a world which is much more awake to spiritual values. In spite of these hidden methods of war-

HROUGHOUT the world of hu- | Christian Science is permeating man activities there are today human thought, and is teaching an unnumbered multitude of mankind the power of the right idea men and women who are working in to overcome all obstacles. This Science is seen that every right idea of manity. To such as these, there may often come the temptation to expect failure and disappointment in return for their efforts in the cause of righteousness. And yet the history of mankind furnishes the proof that the humap race is being freed from the bondage of ignorance and, and waters the earth, making it promise through the unwessied efforts of ductive, symbolizes thus the triumph from the Bondage of ignorance and, sin through the unwearied efforts of those whose courageous example has kindled is the hearts of men a faith in the certain triumph of righteousness. One needs sometimes the inspiration that lies in such words as those of Matthew Arnold:

"But tasks in hours of insight will'd Can be through hours of gloom fulliful can be through hours of gloom fulliful can be a part of the such words and it shall prosper in the thing whereto I sent it," are the words of the prophet.

If we will learn to see each righteous activity as a part of the

righteous activity as a part of the activity of divine Mind, we shall be more and more sure of its success,
"Not till the hours of light return and we shall have less and less de-"Not till the hours of light return and we shall have less and less desire for our own merely personal success. Mrs. Eddy says in "The Anyone who raises a voice against the generally accepted practices of his day is bound to mest with opposition. The world would still be in wrought comes from God and human the grasp of superstition and ignorance, if it had not been for those so-called hereties of each generation of evil which would attempt to nullify so-called heretics of each generation of evil which would attempt to nullify who boildly took their stand against injustice and moral slavery of every kind. As a result of the righteousness adhered to by some of the finest men-couragement and the fear of failure.

more awake to spiritual values. In an inspiration to all those who are spite of these hidden methods of warfare, there is a greater understanding of the availability of that divine protection of which the Revelator to deception; the uses of good, to wrote, "And to the woman were given two wings of a great eagle, that she might fly into the wilderness, into her place, where she is nourished for a time, and times, and half a time, from the face of the serpent."

o deception, the uses of good, to develop the strength will enrage evil. But the very heavens shall laugh at them, and move majestically to your defense when the armies of earth press hard upon you."

From Giant Stairs

Towards the end of the afternoon brisk wind came up from the northwest, driving away the hase which had bung around the moun-tains for a week. Webster being the her head, but no word, she turned, and we followed till she paused before ascending by a ladder to the third storey of the terraced house where she lived.

When seen from below, the outer waits of the dwellings seem to be part of the mess itself, merely hown from the solid rock. Closely approached, they are found to be an another fortress as house. Three parallal lines of stone and adobe, a thought feet long and forty feet high, suning sust and west, are separated from one another by calles or attention of moderate widts—the calle morning: a season passed as well.

"Open House"

By ALTA HALVERSON SEYMOUR

Part II

UNICE recovered from her embarrassment almost immediately, and turning to Nancy said: "Oh, Nancy, I wanted to see you. We have been going through the program and find that we have not a single humorous item. We talked the matter over, and decided that the only thing to do was to cut the play still further to make room

that the only thing to do was to cut the play still further to make room for one. This means that we must drop the part of Fleance. It is hard on you, I know, but we just had to do it."

For a moment Nancy could hardly realize that Eunice was in earnest. She wasn't to have a part in the program after all! Then, making an heroic effort, she said: "That's perfectly all right. I can see that it was absolutely necessary," and turned and left the room quickly, anxious to hide her disappointment. She walked slowly back through the halls and up the stairs down which she had come so gayly a few minutes before.

I don't mind at all," returned Nancy, and her shining eyes bore out her attement. "Fill find some other "ay to help." And in the busy weeks that followed she found many ways to help. There were the costumes to mish and scenery to arrange. Nancy was in her element, and more than once her good humor and sense of fun straightened out difficulties that theatened to be serious.

The Eventful Day so gayly a few minutes before.

making a special effort to get back because I am to be in the play," she thought sorrowfully. "I'll have to write and tell them, and they will be disappointed, of course, and perhaps hey will change their plans again and stay as long as they planned at first. Oh, dear!" Nancy's sigh was order, that each "property" was at almost a gust. "I'll write right away hand. Then the parents began to ar-

again and again and wish for another as good.

"Silent Scott" is really a book for boys, but girls will like it just as well. This story of a frontier acout during the American Revolution has nothing to do with Paul Revere and the Hoston Tea Party and other things is achool histories. We do not think of Tennessee as having much to do with the Revolutionary War, but this story shows what an important part it really played.

Off in the Tennessee mountains, Andy MacPhail and his Indian friend Tuleko, Runner-outhe-Wind as he was called, helped mare history Andy was the best scout on the border and you can guess what that means in adventures. Many of the characters are real people. Farguson, the crack shot of the world, is one. You will like him for refusing to

ingly. "I thought you'd feel that way about it when you had time to think it over," she said in a tone of satisfaction. "I'm glad I found you alone, for I want to have a little talk with you." It was some time before she left the room, and as she walked down the hall to her own quarters, she was distinctly heard to chuckle. Eunice had rather dreaded her

Suddenly, as we are straining our ears to catch more of the shrew's music, there comes a loud "plop" in the water, and instinctively we open our eyes to see what has happened. This time it is a water-vole, and as we watch its brown furry body glide-easily across the water, we forget altogether about the sounds to which we were listening a moment ago. Shall we hide ourselves behind the aspen-bole for a minute or two, and try to discover what the little swimmer is about to do?

He has landed upon the opposite bank now, and believing himself to be quite slone, he settles down for his evening meal. His actions are wonderfully human-like. He sits back in a leisurely fashion upon his haunches, and turns his fore paws into hands, holding the delicate young twigs and shoots of the willows and other plants, just as we would do, while he nibbles contentedly away at them. He even seems to know that willow-bark has a bitter, taste, for he strips it carefully away with his clever little feet before he eats the delectable parts within.

The great thing to remember when watching a water-vole is not to make the alightest sound. If you are very, very silent in your movements, you can get quite close to him, but if you.

Record Cross-Channel Swim

THIS week has brought great news in the world of sport. The English Channel has been conquered, for the first time in its history, by a woman, and in the process she has broken all previous records. Gertrude Ederle, the 19-year-old United States girl wimmer, set out from Cape Gris Nez wimmer, set out from Cape Gris Nez in France at 7:09 a. m. last Friday morning, and at 9:40 in the evening and the Duchess Elizabeth into the

morning, and at 9:40 in the evening touched bottom at Kingsdown, which lies on the English coast between Dover and Deal. This means that she has established a new record of 14 hours 13 minutes for the awim. Miss Ederle attempted the Channel last year, but had to be taken from the water when she was only 6½ miles from the white cliffs of Dover. On setting out a year ago, she dived gayly from the rocks of the Cape, but this year she realized more clearly the grilling experience that lay before her, and walked soberly into the water with set face and grim determination.

The Channel swim is so difficult, not because of the distance—which is only about 19 miles—but because the swimmer must battle with the currents, the ebb and flow of capri-

the swimmer must battle with the currents, the ebb and flow of capricious tides, and possibly with adverse weather conditions. Miss Ederle is a faster swimmer than any of the five men who have succeeded in crossing the Channel before her and this fact proved of great value. When she set out, her trainer, W. T. Burgess, himself a successful Chan-

competitions are held.

The festival is held alternatively in the mountains and by the sea, and to

In Behalf of Colloquial Speech

teacher," until lately an elocutionist.
Furthermore, where the dictionary, strays from the language of the school-teacher or the professor it is usually disregarded; where it is followed it tends again to formalize the language away from what is called "easy speech." No dictionary, so far as my knowledge goes, attempts to standardize colloquial English.

Colloquial Pronunciations

Chicago, Ill. | obscure vowel and the consonants

Chicago, Ill.

Special Correspondence

WHATEVER the literacy of a civilization, however many words are written and duly read within its boundaries, still a million words and more are spoken to one committed to pagier and thus to the written language. An hour of easy dialogue readily runs to 12,000 words, the sixth part of a novel; an hour of class room work to a few thousand less; an hour of lecturing to a few thousand more.

Turn now to any university catalogue or recall the studies in the grammar and high schools of, say, the United States, and note that in pedagogical realms these vast proportions of a million words spoken to one written or read are, so far as the student's time permits, fairly reversed.

Yet the sensible person is seeking, unquestionably, what Kittredge calls, "The easy speech of cultivated men." Where oral English is found in the curricula of our schools of whatever grade, what is the form it takes? In the colleges and universites the studious particularization of the phonetist; without academic walls, the meticulosity of the "expression teacher," until lately an elocutionist. Furthermore, where the dictionary strays from the language of the school-teacher or the professor it is usually disregarded; where it is followed it tends again to formalize.

This susually deat do no others. Yet in good colloquial English a simple wowel "n" is usually done of collegial English as imple of sounds appears to be as unrecognised by dictionaries as the c' m' saucer," or "ng" as in "cap, 'ng own."

The entire process of assimilation of sounds appears to be as unrecognised by dictionaries as by teathers. A following "you" (which is rarely pronounced as given in dictionaries with the full sound of long "u," and the like. Yet it is evident from the abbreviation of verb and negative full processing the studies of the subject of the combination of verb and negative full processor.

Honor Arts and Letters of South

An Organization to be known as the Southern Institute of Art and Letters, designed to encourage progress in the fields of art, natural science, music and literature in the southern states is being projected under the leadership of Harry Stillwell Edwards, author, originator of the Stone Mountain Memorial Coin and member of the National Institute of Arts and Letters. The new organization, it is hoped, will do for the South what the National Institute is doing for the United States as a whole, through electing and thereby placing before the public those persons who have achieved eminence in one or more of the chosen fields. The members of such a distinguished organization will on their part by their best of such a distinguished organization will on their part by their height of the said of the arts in the South. "There are reasons for having a Southern Institute of Art and Letters in spite of the existence of the national and along much the same lines," is Mr. Edward's opinion. In an open letter to the southern people he said, "It has seemed to others as well as to myself that the South of the best of those on which the security to those ideals and institutions we are wont to call southern, but which are, at last, the survival of the best of those on which the South of the best of those on which the security to those ideals and institutions we are wont to call southern, but which are, at last, the survival of the best of those on which the security to those ideals and institutions we are wont to call southern, but which are, at last, the survival of the best of those on which the security to those ideals and institutions we are wont to call southern, but which are, at last, the survival of the best of those on which the scion has plunged. The finer life may be hidden by the material."

Membership in the National Institute is based on notable achievement in the field of art, Hterature, or music, every member being a nativor material in the field of art, Hterature, or music, every member being a nativor material in

members is limited to 250. This limited membership, while entirely commendable, results in the South's having but few representatives compared to the North. Georgia, for instance, has but one, Mr. Edwards himself. The division is not intentional; it just happened that way."

Mr. Edwards stated. He thinks that one reason for this situation may be one reason for this situation may be that the South finds her way to the greater magazines difficult and often

eemingly impossible.

STOCKS RALLY AFTER SHARP PRICE SLUMP

General Motors and U. S. Steel Attract Most Attention

NEW YORK, Aug. 12 (P)—Brisk rallies in the pivotal industrial shures marked the opening of today's stock market, although scattered selling of various motor, oil and specialty issues continued. General Motors was 3½ points higher, and substantial gains were recorded by United States Steel, Baldwin, Atchison and New York Central.

tral.

The initial recovery was short-lived. Prices again gave way soon after the opening before a renewed onslaught of selling directed chiefly against United States Steel and General Motors, both of which forfeited their erly gains, and dipped below is stright's closing levels.

levels.

Speculative sentiment was disturbed by the sharp fluctuations in the market leaders, and uneasiness over the outcome of the General Motors dividend meeting today.

Rail shares held fairly steady but early advances of 1 to 3 points in many active industrials were quickly canceled.

Atchison's Big Rise

Foreign exchanges were steady, French francs responding to a favorable statement by the Bank of France, showing a decrease of nearly 1,000,000 francs in circulation, and repayments of 500,000,000 francs by the state to the bank. Sterling was slightly lower.

state to the bank. Sterling was slightly lower.

The headlong decline in several of the industrials was abruptly halted by the familiar maneuver of rushing in large orders for the standard railroad shares in which advances of 1 to 5 points were soon achieved.

Atchison was the star performer of the investment group climbing 5 points before noon to 144½, a new record figure for all time. Norfolk & Western also got up to a new maximum price for the year, well above 160. General Motors tumbled to 198 before snapping back to 205. U. S. Steel got down to 14½ with a raily to 149‰, and du Pont fell to 285½ before rebounding to 282½.

The renewal rate on call loans was bounding to 292½.

The renewal rate on call loans was unchanged at 4½ per cent.

Bond Trading Restricted

Bond Trading Restricted

Trading on the bond market today was steady but in restricted volume. Virtually all price changes were confined to fractions.

The rails gave the most evidence of strength under the leadership of Norfolk & Western convertible 6s which rose three points. Other roads recording fractional gains included Chicago, Milwaukee & St. Paul 4½s of 1932 and 4s of 1925, certificates, Denver & Rio Grande Western 5s and Seaboard Adjustment 5s.

Other gains in the domestic list ranging from a half to one point were recorded by Jacob Dold 6s, North American Edison 6½s, Interborough Rapid Transit refunding 5s, Consumers Power 5s and International Telephone & Telegraph 5½s.

The foreign list was very quiet. The only strength revealed was by Montevideo 7s which were up 1½.

Mexican 4s of 1904, assented, were off %.

Brooklyn Union Gas 5½s were espe-

off "§.

Brooklyn Union Gas 5½s were especially weak, declining 2%, and losses of ½ were recorded against Kansas Gas 6s, Pacific Power 5s and Bethlehem Steel Refunding 5s.

United States Government bonds were irregular.

CHICAGO WHEAT PRICES ARE EASIER; CORN ALSO LOWER

CHICAGO, Aug. 12 (A)—Influenced largely by unofficial reports from Canada discrediting the Canadian Government crop estimate, wheat values showed an early downward trend. Advices were also at hand that domestic receipts southwest continue heavy and that Kansas City arrivals will increase throughout the remainder of the week.

Opening 461c lower, wheat showed

the week.

Opening % file lower, wheat showed no lasting power to rally. Corn, oats and provisions were likewise easy, corn starting at % coff to %c up, and subsequently declining all round.

Today's opening prices: wheat, September 1.36; December 1.40%; May 1.45%. Corn, September 84%; December 84%; May 95%. Oats, September 40%; May 47%.

OMAHA. Neb., Aug. 12—Standard Oil Company of Nebraska has changed its policy in paying dividends, and hereafter will declare dividends quarterly instead of semi-annually. A quarterly dividend of 63 cents has been declared and an added dividend of 25 cents, both payable Sept. 20 to stock of record Aug. 23.

The stock was recently split up and on June 21 this year an initial dividend of \$1.25 and an extra of \$5 cents were paid on the new \$25 par stock.

Prior to the 50 per cent stock dividend and change in par value from \$100 to \$25, resulting in a six-for-one exchange in May this year, dividends had been declared semi-annually at the rate of \$10 a year, an extra of \$10 also having been paid Dec. 21, 1935. The present dividend of \$2.50 annually on the new \$25 par stock is equal to \$15 apnually on the old \$100 par stock.

NEW YORK CURB GREAT GROWTH OF MOTOR AND RAIL TRAFFIC

Analysis of the Two Industries Reveals Big Development

That the railroads should establish records for traffic and earnings, as in 1925 and first half of this year, simultaneously with record automobile pro-

records for traffic and earnings, as in interest and in this year, similitaneously with record automobile production and earnings reveals a demand for transportation in this country that is governed probably more by business and living standards than by growth of the population.

Comparison of the two industries also reveals, from the railroad standards than the property of the population.

Comparison of the two industries also reveals, from the railroad standards than the property of the

industry—\$31,000, compared with 1,768,000 by the railroads. Including
2% salesmen, garage employees and professional chauffeurs, automobile employees last year numbered 2,204,000.
In the automobile manufacturing
industry alone in 1925 there were 361,442 persons engaged, who received
3549,668,000, an average of 31799. In
the railroad industry there were 1.768,55, an average of \$1635.
United States automobile registration last year was 17.512,633 passenger
cars and 2,441,709 trucks, compared
with 69,000 railroad locomotives, 2,500,000 freight cars and 60,000 passenger
cars. If the 17.512,633 passenger cars
averaged 5000 miles, they did 37,500,000,000 car miles last year, compared
with the railroad's 35,000,000,000 passenger car miles and 374,600,000,000.

DIVIDENDS

STANDARD OIL STOCKS YIELD BIG RETURNS

Investors in New York Company in 1912 Now Get 44 Per Cent in Cash

Standard Oil of New York is a good example of the manner in which big Standard Oil units grow in earning

Standard Oil units grow in earning and investment value over a period of years. The recent dividend increase to a \$1.50 basis by the New York concern serves to draw attention to this point. Ordinarily there is a general understanding of the manner in which shares of the big Standard units enhance in market value over a period of years. But what is probably not generally appreciated is the fact that on a long pull they have shown a splendid investment yield in cash dividends. Usually only the current investment return is given full consideration, and frowned upon because it runs from 2 per cent to 4 per cent.

Yet an investor who bought to

yet an investor who bought one share of Standard Oil of New York in share of Standard Oll of New York in 1912 at \$275, the price then prevailing, would now be getting a cash dividend yield of 44 per cent a year on the new

dividend basis.

Over a period of 15 years from 1912 to and including all of 1926, the one share, or its equivalent after stock dividends, will have received total cash dividends of \$1103. This would be a yield in cash of \$74 a year, or an annual income basis averaging 27 percent for 15 years.

Increase in Value

Increase in Value

This one share costing \$275 has
grown to 75 shares of \$25 par through
stock dividends and reduction in par,
with a current market value of \$2550
and yielding \$120 a year in dividends.
At its present price of \$34 a share, New
York yields 4.7 per cent on the new
dividend basis.

The manner in which Standard Oil
of New York has grown since dissolution illustrates rather forcibly results
obtained from the old Standard Oil
policy of reinvesting earnings in the
business.

From 1912 to 1925, both inclusive,
New York earned net available for

Just after dissolution, early in 1912,
Standard of New York had \$15,000,000
capital. Selling at \$275 a share, its
150,000 shares had a total valuation
of \$41,250,000. It paid \$900,000 in dividends that year.
Allowing for the full exchange of
General Petroleum shares, New York
will have issued about \$417,500,000
stock represented by 16,700,000 shares
of \$25 par stock. At \$33 a share current
price, this puts a value of \$551,100,000.
The current dividend rate of \$1.60 a
share a year means disbursement of The current dividend rate of \$1.50 a share a year means disbursement of \$26,720,000 annually. By comparison the \$300,000 distributed in 1912 is insignificant. The increase in dividend rate just made of 20 cents a year, from \$1.40 to \$1.60, alone means an additional butlay of about \$3,350,000 a year, nearly four times the total payment in 1912.

Stock Dividends Numerous

All the increase in share capital, so far as it relates to original holdings, has been through stock dividends. Quite a little stock was issued for Magnolia Petroleum and General Petroleum in the last six months, but New York shareholders have never subscribed to additional stock.

The \$15,000,000 original capital grew to \$75,000,000 in 1913 by a 400 per cent stock dividend. In 1922, a distribution of 200 per cent in stock was made, and par reduced to \$25. Early this year a 25 per cent stock dividend was paid.

New York did \$50,000,000 of outside

paid.

New York did \$50,000,000 of outside financing through the sale of debendancing through the sale of debendance.

BANK OF FRANCE PARIS, Aug. 12—The principal items in this week's statement of the Bank of France (in france) compare as fol-lows:

BANK OF GERMANY BERLIN, Aug. 12—The Reichsbank condensed statement, in reichsmarks, follows (000 omitted);

Silver and coin. 111,200 109,500 Gold reserve ... 1,493,500 1,492,500 Of which in fgn bks. 260,300 260,200 Bills exch & checks. 1,127,000 1,198,500 Cher assets ... 721,300 644,000 Reich circulation ... 2,971,700 3,105,500

IRON PRICES ADVANCE PITTSBURGH. Aug. 12—Scrap prices save advanced 50 cents to \$1 a ton. Activity is greater than for several weeks. Hills in the Youngstown district have purchased 45,000 to 50,000 tons of heavy melting steel at \$17.50 a ton. No more coavy melting is available at \$17.50 and

LABOR MAKES LARGE PROFITS AS FINANCIER

Engineers Closing Out New York Activities

NEW YORK, Aug. 12-The Brother hood of Locomotive Engineers has now practically withdrawn from all its financial undertakings in this center

The Brotherhood's sale of its interest in the Brotherhood of Locomotive Engineers Co-operative Trust Company, an uptown institution of \$700,000 capital, disposes of one of its last enterprises in this city.

It is not believed that the theory of a brotherhood bank along the lines originally laid out by its organizers proved altogether profitable in this city. The institution will change its name.

city. The institution will change its name.

It was a little more than three and a half years ago that the brotherhood first turned its attention to New York and was introduced into financial circles here, by being offered a substantial interest in the Empire Trust Company. That investment, it turned out, started a connection that has proved highly profiable to the Brotherhood, netting it close to \$1,500,00, all told.

hood, netting it close to \$1,500,00, all told.

When the brotherhood decided in January, last, to dispose of its holdings in the Empire Trust Company, it sold its stock, through Leroy W. Baldwin, president of the Empire, at a profit, it is understood, of approximately \$600,000 over its original investment.

Real Estate Activities

The brotherhood's investment in the Equitable Building was still more advantageous. It participated in a syndicate, including Leroy W. Baidwin and August Hecksher in March, 1928, which took over control of the building from T. Coleman du Pont and others. At one time the brotherhood had more than a 50 per cent interest in the building.

Practically all of the brotherhood's investment has lately passed to William H. Vanderbilt and Leroy W. Baidwin, who boght a majority of the common stock. This undertaking, covering about 15 months, is understood to have netted the brotherhood something more than \$90,000.

These profits are in addition to interest returns in the meantime of more than 12 per cent.

When Mr. Baidwin, who had a block of Empire Trust Company stock to dispose of in the fall of 1922, consulted with Warren S. Stone and other brotherhood leaders about their taking the stock, he made them understand it was purely a business proposition which offered the opportunity of being mutually advantageous.

Mr. Baldwin at that time had certain expansion plans in mind and he told them he would see that the brotherhood would have no cause to regret the step, which looked at the time like a radical departure from their point of view.

From a banking standpoint, too, it

Radical Experiment

Radical Experiment

From a banking standpoint, too, it
was a radical experiment. It was the
first time a financial institution, identined with capital interests, was ready
to admit into co-operation with it a
labor organization; an organization
that on occasions had locked horns
with representatives of capital. So, for
both sides of the compact the new experiment in a financial partnership
was not started without its apparent
drawbacks.

was not started without its apparent drawbacks.

At the same time there were many bankers and financiers as well as econ-omists who welcomed the advent of a labor organization into the inner cir-cles of capital as tending to smooth out industrial difficulties and bring about a closer viewpoint on matters of wages, etc.

etc.
It is believed that at the height of its financial undertakings in co-operation with Empire Trust interests the Brotherhood of Locomotive Engineers furnished close to \$19,000,000 of liquid

furnished close to \$10,000,000 of liquid funds.

That this association has also been advantageous to the Empire Trust Company is indicated by its expansion over the flat three years or so. At the time of the stock purchase by the brotherhood people the trust company's capital and surplus were a little more than \$4,000,000 and resources \$47,000,000. Today the company's capital structure is more than \$5,000,000, its deposits exceed \$22,000,000 and aggregate resources \$90,000,000.

In addition to dividends at the rate of 12 per cent a year extra dividends have so far been paid this year amounting to 4 per cent.

ITALIANS TILL FRENCH FARMS NEW FARM PLAN

(Continued from Page 1)

conquest of Gaul." It is a fact that Brotherhood of Locomotive many towns and villages are entirely Italian and that the Italian language is almost the only one spoken. How-ever, the French have a tight rein on the schools, and the children, who are a numerous, ruddy-cheeked and sturdy-looking lot, are being taught in French and are being educated as if they were in fact young French-men. Center of Immigration

The widespread character of the Italian penetration of France may be judged from the fact that in the department of Lott-et-Garonne, which is in southwestern France, not a great distance from Tolouse and within striking distance of the Bay of Biscay, is one of the best organized centers of Italian immigration, with its headquarters at Agen. Here with its headquarters at Agen. Here may be seen at work the strong efforts being made both by the Italian Government and by the Italian authorities of the Roman Catholic Church to maintain some semblance of control over the Italians who are making new homes in France.

The Italian Commissariat of Emi-

The Italian Commissariat of Emigration in Rome does its utmost to
maintain the use of the Italian language and Italian customs among
the Italians who have settled in
France. Its leader and his agents
are militant Fascists, and in France,
at least, they work in perfect cooperation with the church authorities who have been imported from
Italy. The Roman Catholic Church
in Italy appears to distrust the in Italy appears to distrust the church in France as spiritual shep-herds for Italian immigrants, and every effort is made to persuade the Italians in France to continue under the guidance of priests of their own

Refugees From Fascism That these efforts are meeting

nationality.

with only moderate success is plain to an outside observe. First of all. to an outside observe. First of all, the average immigrant is concerned only with working his land and getting ahead. His interest in Italian political affairs is academic at the best, and tends to become more and more indistinct as his residence in France lengthens. There are some settlers in France who are actually refugees from the Fasciat regime. These men have invested their funds in French land, which has been selling at an almost absurdly cheap

in French land, which has been selling at an almost absurdly cheap level, and their only interest in Italian politics is to discredit the present rulers of that country.

On the religious aide, the French priests do not look with equanimity on the invasion of their territory by Italians. The immigrant himself is disinclined to take any active part in differences between the French and Italian priests, and would rather his women and children went to the old French churches than contribute money to build a church for an imported Italian priest. The Italian priest, being without the background of authority he would have in Italy, is at a decided disadvantage, and the whole matter works out in a way whole matter works out in a way quite satisfactory to the French. The Metayer System

The Metayer System

When the Halians first began to the first the more westerly part of southern France in large numbers considerable opposition developed because of an alleged inclination of the Italians to rent land, rob it of the Italians to rent land, has been corrected by arranging for the pursue of the Italians on the métayer system. Some French writters resent this accusation against the Italians who knew the rules governing soil conservation in their own much less fartile northern Italy and are carefully tending the land that has fallen to them in France.

In the case of the Italian industrial the case of the Italian industrial worker, who is generally found in the cities and larger towns, the tendency to make a permanent home in France is not so apparent. Many such workers have come with the index of only staying a few months or years and a great many of them have families in Italy. Nevertheless, marriages between Italians and in such cases the permanent home of an amendment of the Agriculturalized because of the Italians and in such cases the permanent home of an amendment of the Agriculturalized because of a ccurate natural scientific research, and was only capable of such was only capable of such was collected, and meta-physical pursuits. In mathematics, physical pursuit

BRITAIN TRYING

More Money Being Expended on Artificial Fertilizer Than Ever Before

Special from Monitor Bureau LONDON-It has been the custom Station to invite agriculturists to in-spect the experimental plots and laboratories during the summer season, and a representative gathering spent a most interesting day at the station recently.

In the morning a tour of the field plots was made, while during the afternoon explanations were given in the laboratories of the research work

station, in a subsequent speech, men-tioned the fact that additional glasshouse accommodation was required for the conduct of plant research. For these further investigations it was estimated that a sum of £3000 would be needed. Toward this amount the Rockefeller Institute has promised to give £3000, while the Ministry of Agriculture would grant £500 on the condition that the re-maining £500 should be raised by private subscription.

It was pointed out that the main object of the research work done at Rothamsted was to provide guidance to farmers as to the means whereby it might be possible to produce larger crops at less expense. Toward this end, trials with fertilizers, especially new fertilizers, were carried out and reports were issued from time to time. It was estimated that the annual expenditure by British farmers on artificial fertilizers amounted to about £7,000,000 and the value of about £7,000,000 and the value of farmyard manure used in a year to £14,000,000. If research could demonstrate how a portion of this large expenditure could be saved, work of the greatest national importance would be accomplished.

Soil physics was a subject now preceiving considerable attention at Rothamsted. Hitherto the importance of this branch of agricultural sci-

of this branch of agricultural sci or this orange of agricultural sci-ence had not been realized. Sir John Russell, in alluding to the prepara-tion of artificial farmyard manure, mentioned that the supply and de-mand relating to this material steadily increased and this manure was evidently appreciated by market gardeners and farmers who did not keep live stock. Visitors showed keen interest in

Visitors showed keen interest in the plots to be seen on the famous "Broadbalk" field, where wheat has been continuously grown for over 80 years. One of the chief practical difficulties experienced during this long period of continuous cropping has naturally been the growth of weeds. In an attempt to rid the land of weeds a new departure is being made this season, when one end of the field is being bare-fallowed. It is proposed to bare-follow the other end of the field next season, while one central strip representing about onecentral strip representing about one-fifth of the field will be bare-followed in both seasons. The extent to which this treatment will prove successful in these classic experiments will be watched with the greatest interest

Associated Gas and Electric System

Pounded in 1852

50% Greater Savings

Savings mean productiveness, thrift and buying power. Buying power means capacity to provide for the necessities and comforts of life.

The average savings account per man, woman and child in the United States is \$204. In the 12 states served by the Associated System it is \$300.50, or nearly 50% larger.

The growth of the electric light and power industry depends upon the buying capacity of its customers. The greater their purchasing power, the more they will avail themselves of the appliances and labor saving devices which the use of electricity affords.

The thrift and buying power of the population served by the Associated properties is reflected in the more than average growth in customers and electric output. The electric output has increased 45% and the number of customers 75% since 1920.

ZADIO

PEACEFUL USE FOR GUNS AND RADIO FOUND

War Twins Have Turned Their Abilities Into **Useful Channels**

GLASGOW (Special Correspondence)-A steady bombardment by guns is going on off the coast of Scotland continuously these days. Wireless signals control these guns. Certainly this sounds like grim reminders of 1914-1918, but actually the whole arrangement is a most ingenious affair for the protection of those who go down to the sea in ships. The noise-producing ability of these guns is their important function. They are part of a fog system which requires no human attention and have just been installed on the Clyde.

Installations of this kind render possible the erection of unattended lighthouses and fog signals in many difficult situations or on danger-ous rocks where it is at present too expensive to provide light keepers for a light or fog signal, where it is impracticable on account of rocky bottom, strong tides, rough seas, or even ships' anchors, to maintain a submarine cable connection for an unattended cable connection for an unattended light or fog signal, or otherwise im-practicable to build a lighthouse. They will also be useful at many places in saving the cost of light keepers in attendance. Rosneath Patch, where these wire-

less actuated signals have been installed, is a sand bank in mid-channel at the entrance of the River Clyde. A reinforced concrete. lighted beacon marks the Patch, and now for signals have been installed at three points. These signals are automatic in action and are explo-sive, the explosion being obtained from a mixture of air and acetylene

system of wireless receiving apparasignals. The synchronizing arrangement renders them immune from atmospherics and interference from other wireless waves. When the fog lifts and the guns have to be stopped, another set of impulses, with a different period, is sent out by the transmitting station Sufficient energy.

NEW YORK—Ellen Wilkinson, M., visiting the United States in the aterest of the families of British coal miners, was guest at a luncheon in her honor arranged by the co-operation committee of the National League of Women Voters. In de-scribing conditions and the need of

"Debts have piled up, whole min-ers' families are living on approxi-mately \$2 a week and no relief is mately \$2 a week and no relief is being given to men or boys over 14 years old," Miss Wilkinson told an sudience which included Mrs. Gif-ford Pinchot, Miss Ruth Morgan, Mrs. Gordon Norries, Mrs. Lewis Thompson, Mrs. Franklin D. Roose-velt Mrs. Carrie Chapman Catt, Miss Mary Garrett Hay and a distin-guished group of women in civic and bolitical affairs.

Shielding Permits Use of Loop

HIELDING of receivers is a prime topic of discussion these days, and there has been a regular wave of popularity for this practice sweeping over the radio industry. As with any new idea, there is a great tendency to oversell it, with the result that the public expects each new arrival to be the "be all and

Shielding has certain advantages and some disadvantages, and, as with every engineering product, the total result must be a compromise. This is not the time nor place to discuss the qualities of shielding except one, and that is that the complete screening of R. F. coils permits the use of a loop antenna with a

tuned radio-frequency receiver. One of the earliest concerns in the neutrodyne field was the Freed-Eisemann Company, and they are announcing a loop-operated tuned R. F. neutrodyne set which incorporates all the latest developments in the shielding art. Eight tubes are used, while only one tuning control is necessary, which operates through a vernier gear arrangement to a reading drum bearing a pre-calibrated wavelength scale. The drum is clearly visible in the open center compartment of the set. With developments of this type the independent manufacturers have met, point for point, practically all the claims made by the manufacturer, of the restricted superheterodyne. One of the earliest concerns in the neutrodyne field was the Freed-Eisemann Company, and they are

Special from Monitor Bureau

CHICAGO, Aug. 12—Illinois has
the best outlook for the fall in several years, according to a report
from Reuben D. Cahn, a bureau chief
of the Illinois Department of Labor.

Employment is 6 per cent above the
situation a year ago, and 5 per cent
above this period two years ago, he
stated. The mining situation is vastly
improved, too, he declared, reports
having come during the month of reopening of 11 mines whose pay roll
exceeded 5000 persons.

EDITORIALS

The series of articles upon the migrations of labor in Europe begun in yesterday's Chris-

Labor Tides in Europe

tian Science Monitor are full of suggestiveness to those who are interested in social movements and the fusion of peoples. Today the great bane of continental Europe is the exaggerated nationalism

which has divided it into nearly a score of distinct nations, each tight within customs barriers, striving to be self-contained and peering out at its neighbors with ill-concealed suspicion, dread and enmity. Freedom of trade has no existence; and social intercourse, the surest aid to international harmony, is restricted at every point and in the most irritating ways.

Perhaps in the mobility of labor may be found the force that shall ultimately penetrate these barriers and throw them down. For the man in search of a job travels far and wide to find it. The United States, after opening wide and freely its gates to such seekers, was finally forced to close them. Even yet the pressure is so great that unnumbered thousands slip through ille-But much of the current has been diverted to other lands, to North Africa, South America and those few countries of Europe which still remain underpopulated and in which the job still seeks the man.

Of these, France today stands first. Her restricted birth rate makes little progress in restoring the population sacrificed during the World War. The rebuilding of the devastated regions and the great expansion of industry have caused so steady a demand for labor as to draw across the frontier immigrants numbering already more than 3,000,000. Russian refugees rank first in numbers, then Greeks, and then Italians. It is interesting to note that the Monitor's investigator finds that the flood of Africans from the French colonies has been checked, and that those already in France are drifting back, displaced by the superior economic capacity of white labor.

Already France, in sections, presents some of the problems familiar to observers of the foreign invasion of the United States. There are villages, and sections, in which Italian has become the dominant language, and the local customs and thought have ceased to be French. The Italian Government is making strenuous efforts to hold the loyalty of these expatriates, while the French are no less determined to absorb them gradually into French nationality. Our observer reports that the French effort seems to promise success. Indeed, it would appear that the melting pot would prove more generally effective there than it has in the United States.

A population in the United States which was originally essentially Anglo-Saxon, has been slow to fuse in any sense with the Latin or Slavic invaders. It has at points been submerged, at others it has retreated before the flood, but there has been little of absorption. In France the Latin meets other Latins on terms of racial equality, while long propinquity has bred a sort of familiarity with Teuton and with Slav. There has been no such sense of shock as comes over the man of American lineage suddenly confronted with the fact that men of alien thought and habit have descended upon his home in overwhelming numbers. For this reason France may succeed in assimilation where the United States has progressed but slowly, if at all.

Perhaps the tides of labor, flowing back and forth, may yet do more to establish the United States of Europe than all the endeavors of the political theorists who just now are preaching it so widely.

That four years of experimentation by its division of student loans should have led the Har-

Helping Students to Help Themselves

mon Foundation of New York to reach the conclusion that a system of student loans administered in accordance with strict business practice and ethics should in most instances take the place

of scholarships in American universities and colleges may come as a considerable surprise to some. For it seems to strike at the very heart of a system that has become endeared to many people as representing the natural way to reward the exceptional student and the normal method whereby those in need of. help in their educational careers can most read-

ily receive that aid. Primarily the foundation claims, in its public statement just put out, that the most important result to be obtained from such a change would be that students would be self-supporting instead of being dependent upon outside help. And secondly the advantage is claimed that institutions now running at a deficit would be enabled to balance their budgets by charging the cost of training to the student through the medium of a deferred obligation for tuition. It is particularly interesting that the report indicates that practically all of those to whom loans have been made since the practice was started in 1922 by the organization have managed to meet their obligations, but frequently at a date some time after due. The conclusion that has been reached, therefore, is that students as a class appear to be equipped with a keen sense of honesty but with only a scanty appreciation

of the importance of a financial obligation.

In all of this, therefore, there is the larger issue involved of the best interests of the stu-dents themselves. It has long been a truism that the most satisfactory way to help another is to put him in the way of helping himself. Yet it has also been the case that to start a youth out in the world under a heavy burden of debt is to handicap him. That the debt was incurred for a worthy purpose does not make it less burdensome. Despite the authority of the Harmon Foundation, this side of the question merits attention.

That the system of scholarships has frequently tended to inculcate a sense of lack of responsibility appears to be true, and hence that it needs to be replaced by something avoiding this

erroneous state of affairs can hardly be questioned. That the new method of student loans would obviate this false outlook has great weight of authority behind it, and that it should be encouraged would therefore seem obvious. There may yet be instances in which the former system would still represent the most satisfactory method of taking care of the situation. but that this system has been in the past greatly overplayed is without question quite provable. Any procedure that is put forward as likely to both student and college is certainly worthy of more than merely slight attention.

From his summer camp, word was flashed to all the American newspapers stating that

President Coolidge was happy over the thought that the United States has had three years of unusual prosperity. While the reports did not quote the President directly, the indications were clear that he in-

Has the United States Been Prosperous?

tended to have this fact called forcibly to the attention of the public and in that way put to rest all those pessimistic conjectures which have been in circulation. There has been so much sentiment expressed within the past few months on this subject that the actual facts are frequently lost sight of. There have undoubtedly been a number of business men and financiers who were willing to voice caution and to make forecasts which were more or less dire. That these forecasts have failed to materialize has been only too obvious, but it still remains to quiet, in certain quarters, the constant pessimistic analyses of business.

Another and probably a more accurate way of measuring business prosperity is by the labor disturbances. According to the tabulations of the United States Bureau of Labor Statistics, there was a slight increase in the number of strikes in manufacturing establishments during 1925 but not sufficient to change the general trend downward. Now strikes indicate discontent on the part of the workmen, which may be inspired either by a downward movement in wages or by abnormal increases in profits to employers. That the past three years have been comparatively quiet would seem to indicate a greater measure of industrial contentedness, and in that respect President Coolidge was perfeetly correct in concluding that the country has been prosperous.

The Bureau of Labor Statistics reports:

Year											umb		Num	
1921											1785		1,099,2	47
1922											899		1,612,5	62
1923											1199		756,0	84
1924											898	Selly"	654,6	41
1925											1012		428,2	18
	В		•									2000	1000	STATE OF THE

This record was in striking contrast to what happened between 1916 and 1920, during all of which period the number of disputes' exceeded 2000 per annum, and the number of employees involved over 1,250,000 each year. In 1921 and 1922 most of the strikes were defensive, to prevent loss of something already achieved, rather than to gain some desired goal. This was followed by an aggressive period, when an effort was made to regain losses. During 1924 and 1925 the number of defensive strikes again increased. This record is made clearer by the following tabulation of the number of strikes caused by wage controversies:

Year	Wage Increase	Wage Decrease
1921	 120	806
1922	 156	261
1923	 445	49
1924	 255	125
1925	 277	116

It is shown here that the tendency to decrease wages took a turn with the closing of 1922. Since 1923 there have evidently been more wage increases than decreases. That would afford a positive proof that the period since 1922 has been uniformly prosperous, and that the industrial conditions were such as to afford a period of greater contentment than any like period since the World War. That is a condition of greater importance than the dollar value of goods produced and consumed. It is of greater importance than the chart of stock market prices or relative profits. It means a breader distribution of wealth and a larger prosperity to the greater number.

The structure which has been reared by the

The Shipping Board and the Isolationists

advocates of American isolation and labeled by them "the United States" is built upon the declaration that the resources of the country are so vast and varied that it can get along prosperously entirely without the rest of the world. On this one prop

icies of the exponents of American self-sufficiency in the material, political and moral realms. That prop, so necessary to the isolationist structure, has recently been knocked from under it, however—not by dreamers, or idealists, or pacifists, or internationalists, but by that practical body of men who deal only in solid facts, the Shipping Board of the United States. The board has just made a report on the results of a survey of its records, and its con-clusions form most valuable reading for the American public, in order that it may see clearly how vain and without substance is the notion that the United States can exist in any

stand all the supplementary assertions and pol-

condition of present-day civilization, comfort or prosperity without tremendous reliance on the resources and the good will of the other nations of the earth. The Shipping Board says that the domestic resources of the United States can and do supresources of the United States can and do supply enough grain, petroleum, cotton, coal, iron and copper for the country's needs, but that foreign countries must be called on to furnish either all or a large part of a number of other major commodities, including rubber, silk, potash, manganese, vegetables, sugar, fruits and nuts. Indeed, the list of absolute necessaries which the United States must import, if given in full would contain thousands of items.

given in full, would contain thousands of items.

It is thus perfectly true that the country can produce vast heaps of crude products like/cotton, coal, iron and grain, but no modern nation

can live in comfort on those raw materials without their being worked up and treated with elaborate, multifarious processes that depend absolutely on importation of huge quantities of materials that the United States does not furnish from its own soil, mines and forests.

There is one way only in which the United States can obtain the supplies it must have, and that is by trade, by the exchange of what it does produce for the necessary things it cannot get within its own borders. The sensible thing for the American people to do, in the light of their Shipping Board's report, is to decide how the intercourse of civilized commerce is to be carried on with other nations, whether with the honesty and fair dealing and as much freedom from artificial barriers as possible, as they insist shall be the case in their internal business, or by the use of unfair methods, and the employment of either economic or military brute force.

The choice of methods on which the people of the United States will ultimately insist is scarcely open to question.

A recent questionnaire sent out by a radiocasting station interrogated more than 5000 radio listeners and dis-

Men and

Women

as Radio

Announcers

covered that a propor-tion of about 100 to 1 preferred men to women as announcers, thus providing a vastly larger radio public with something to talk about, and causing surprise that the

votes were not more evenly divided. It would seem, however, that the 5000, men and women together, constituted a reasonably good sample of the larger public, and that man is thus unexpectedly voted into an unshared prominence. The lady of whom the poet Rogers wrote,

Her voice, whate'er she said, enchanted, might, if still available, challenge this suprem-

acy; but the poet had never heard the lady by radio, and it would appear possible that that channel of expression would have served to modify her voice. Such, at least, is one suggested explanation of the vote-that a man's voice "takes" better because it has more volume. The lines of another poet should, therefore, be truer-but are not in present radio experienceof the average masculine announcer:

He ceased: but left so charming on the ear His voice, that listening still they seemed to hear.

In all seriousness, however, the qualification of announcers is an important matter. The voices of the announcers are heard pretty nearly everywhere in the land; their manner of speech sets examples that are at present observably good, bad, and indifferent. Much has been said, both in England and in America, about the influence of the speaking stage upon speech in general, and the desirability of a speaking stage that should produce a uniform influence. The opportunity of the announce to expand such an influence is greater than that of the actor in proportion as his audience is greater; and the influence itself may conceivably be more potent and persuasive because the announcer is, so to speak, almost like one of the family, unseen, but nevertheless coming and going in a casual and familiar manner. The diction of announcers would, if they all used a similar diction, set a standard likely to be widely followed by normal habit of imitation. But they do not all use the same diction. Perhaps some day they will all be fellows of an Anglo-American academy of radio announcers, each an F. A. A. A. R. A., but that seems unlikely.

Meantime, efforts to explain the questionhaire bring out, incidentally, some of the things that an F. A. A. A. R. A. would not do. It appears that the position tends to affect the announcer toward a patronizing tone of voice, which is not always liked by listeners, or to a hail-fellow and-a-pat-on-your-back manner of speech that equally fails to please all. Or again, wishing to avoid such extremes, the announcer assumes a colorless monotony—one is again

reminded of the poet's:

His voice in one dull, deep, unvaried soundeveryday use. Here, in short, is an art whose technique has been appreciated and approxi-mately mastered by few men, and, so far, it would appear, by no woman.

Editorial Notes

Despite the fact that there are unquestionably hundreds of hotels in the United States, the pro-prietors of which are loyal in their observance of the prohibition regulations of the country, a specific statement to that effect, involving a definite stand for law and order, is not so common as to make it unworthy of special attention. Particularly is this the case when the hotel is situated in a locality that is attracting large numbers of tourists from almost every section of the Union. Hence, the statement placed on every table in the dining room of the Hotel Ferguson, Hyannis, Mass., that positively no liquors are allowed in it, with the comment that failure to comply with this request will make it impossible for us to serve you," merits a word of approbation. It takes courage to decide on such a stand as is represented in the action taken by this hotel, but it is just that type of courage which was responsible for the great prohibition reform itself and which can be trusted to carry that reform through to its logical conclusion.

Though it will be twenty years yet before the Though it will be twenty years yet before the Brisbane (Australia) Courier can boast a centennial number, yet its eightieth birthday issue, recently published, gives abundant promise of what that hundredth year number will be like. And the relative aspects of the situation must be considered, for, as the paper says in an editional action while algebra years is not a great torial notice, while eighty years is not a great span in the life of the nations, or the laying of the strata of languages, or the great building up of civilizations, "to us British people, to us Queenslanders, it is an epoch." One point of particular interest may be noted. It is put in these words in the edition it. question:

The Courier . . . was a clean family paper, and it was the irrefragable law of successive proprietors and editors to maintain that reputation. Editor has followed editor, but the change of man has not meant a change in policy

The Diary of a Political Pilgrim

FROM A LONDON CORRESPONDENT

At has recently been seen a violent recrudescence of the controversy between the United States and Europe about interallied debts. The financial crixis has produced outbursts against American financial harshness in France. The ratification of the Anglo-French delat settlement has produced another parliamentary debate about the whole problem. An utterance by Mr. Mellon has produced an elaborate rejoinder from Mr. Churchill.

These ebullitions, with their effect in newspaper recriminations across the Atlantic, are very unfortunate. Under

present-day conditions, however, they appear inevitable, because there is a profound and genuine difference of view about the whole debt problem, and because as long as the payment of reparations to the Allies by Germany and of their debts to the United States by the Allies is conti events will bring that difference flaring to the surface from

History will probably record that the financial and economic muddle made by all the Allies, including the United States, after the war, was quite as bad and as shortsighted as the political and racial muddle of Europe made by the Allies. The financial policy adopted about reparations and debts has certainly been largely responsible for bad times and the persistence of armaments and difficult respirations in Europe. political recriminations in Europe in the last few years. In the interest of a future straightening out of these still unsettled problems it may be well once more to try to state as fairly as possible what the fundamental differ-

ence of view between Europe and America really is.

The European view is that after the entry into the war of the United States in April, 1917, the conflagration became a common war, and that at the end of it some sort of balance should have been struck between the contributions made to its successful ending by the various partners. The European points out that before the United States entered the war her manufacturers and people had made immense profits from the supply of munitions to

the Allies, charged for at a very high price.

The European also points out that after the entry of the United States the Allies went on losing immense numbers of lives in what had become an American war while the United States was getting ready to play her part. He claims, therefore, that the debt cannot properly be treated as a commercial debt at all, and that common equity requires that the sacrifices which he made should be set off against the debt which he incurred for foodstuffs and supplies to enable him to go on fighting.

The European further says that much of his post-war troubles are directly attributable to American insistence that the European nations should pay their war debts to the maximum of their espacity to pay. In the case of countries like Great Britain, which have paid, the debt settlement has aggravated unemployment and industrial troubles. In the case of countries like France, which have not made a settlement, the debt liability has been one of the principal factors in preventing them from straighten-ing out their finances, especially as they have had to find ense sums for the reconstruction of the devastated

This is not at all how the American citizen views the case. He denies that the war was ever a common war in the sense in which Europeans use the term. He thinks that the United States came in partly for her own ends to his need.

but very largely to save Europe itself from falling under the Prussian heel, and that she made an immense and adequate contribution in aid of Europe by sending 2,000,000 troops across the Atlantic and incurring a domestic debt of \$30,000,000,000. He claims, moreover, that there is no reason whatever why America should go on to cancel or diminish the debts she is owed below what is

commercially justified.

Then he thinks that the Allies on the whole did very well out of the war. France got back Alsace-Lorraine and large territories in Africa and Syria. Great Britain painted a great deal more of the map red than was red before.
France beheld the threatening German army dissolved before her eyes. Great Britain saw the German fleet sunk in Scapa Flow. The United States, which he feels was practically invulnerable, desired and obtained no territory at all.

Finally, the American replies that the Allies have brought the larger part of their troubles on their own heads. Instead of tackling their own problems, they have equabbled endlessly among themselves. Instead of making economies in their governmental expenditure, they have spent more money than ever on armaments. If the United States has been a hard creditor, they have been far more harsh and more unreasonable about reparations from Ger-many. In any case, the basis of any international recon-struction at all must be enforcement of the sanctity of inancial contract.

To this the European replies that colonies are not assets, but heavy liabilities; that the United States was offered good mandates, but refused them; that if the Allies had not done the fighting, America would have had to have done it berself, and so on. To which the American comes back with the query, "Then why don't you hand the colonies back to Germany?" or "What about rubber?" And so the miserable quarrel degenerates into the acid war cries which have of late been hurled across the

The truth; is that there is a great deal to be said for both points of view. The trouble is that neither side is yet really willing to listen fairly to the other's point of riew. There will be no real relaxation of the tension and bitterness in Europe, no restoration of those confident and friendly relations between the United States and the peoples of Europe which are essential to world peace, until both the debt and reparations problems are honestly and fairly discussed between all concerned sitting round a common table with all the cards on the table.

The new or Christian law warned men against the deceit-

the new or Christian law warned men against the deceit-fulness of riches and the folly of trying to store up sub-stance in barns, or their modern equivalent, banks, and told them that the way to happiness was to apply to the management of wealth the Golden Rule. + + +

The only way out of the present-day economic troubles in the sphere of international finance and indebtedness, as in the internal sphere of national debts or the relations between Capital and Labor, is to go back to the economics of the Bible, now so disregarded. We may try to ignore them, but sooner of later we shall be obliged to obey them as we obey the laws of mathematics. Then, and then only, will international strife be stilled, and then, and then only, will everybody be supplied according

The World's Great Capitals: The Week in Rome

MOTOR roads are becoming quite popular in Italy, and the great success obtained by the "Autostrada Milano-Laghi," as the motor road uniting Milan with the famous Lombard Lakes of Como, Varese and Maggiore is called, during the first year in which the whole system of this motor road has been open to traffic, has led to projects for the construction of other similar roads, reserved for motor traffic only. The project of the "Milan-Lakes" highway is due to the initiative of Piero Puricelli, an enterprising road engineer and head of the most important road-making firm in Italy, who drew up a scheme having for its object the development by private enterprise of special motor roads serving Milan and the residential and smaller industrial centers

in its vicinity.

Before submitting his scheme to the approval of the Before submitting his scheme to the approval of the Government, Signor Puricelli carried out some interesting experiments to show the economy in the cost of motor traffic that could be effected with such special roads and the enormous advantages obtained in speed, comfort, diminished consumption of petrol, etc. On account of the novelty of the experiment, the traffic regulations of the road required long study, and some alterations to the original rules have already been made. On the whole, however, the success could not have been greater, and the future of the motor road may be said to be assured.

The average number of motorcars which use the road

The average number of motorears which use the road is greater than that which was fixed when the project was laid down, and the number of subscription eard holders is steadily increasing. For the present the road

was laid down, and the number of subscription card holders is steadily increasing. For the present the road is open for nineteen hours a day, from 6 a. m. to 1 a. m., but there is now talk of introducing a continuous service, and this innovation will surely bring further benefits to the users of this unique road.

In spite of the fact that Italy possesses a very important motor-vehicle industry, the development of motor traffic in Italy has been delayed by the comparative poorness of Italian roads, which, with a few notable exceptions, suffer from inadequate foundations and bad surface. Much has already been done in the way of repairing old roads, but as practically all the money available for road building is required for the construction of new roads in southern Italy and in Sicily, some time must clapse before Italy's public roads can be brought to the level of those in other countries. In the meantime, however, several private companies have been formed for the construction of motor roads, and the Government is assisting by granting special facilities and by allowing them to exact a foll from their users for a certain number of years. There are at present under construction two new motor roads, the Milan-Bergamo and the Rome-Ostia, but several others have been projected, and it is confidently expected that within the next ten years the most productive industrial zones of northern and central Italy will be connected by a network of motor roads, and that Italy will thus become the most advanced European country as regards road transport.

transport.

The campaign vigorously conducted by the Italian Government for increasing the production of grain by means of modern machinery and good fertilizers has been crowned with great success, and as a result of the greater use of motor tractors and of seed-distributing machinery, the average annual output of grain, which during the last ten years was 45,000,000 quintals, will this year reach and possibly also exceed 50,00,000 quintals. Better results would have certainly been obtained if weather conditions during the spring months had been more favorable. Every means of propaganda was used to induce the peasants to abandon their primitive methods of cultivating the soil, and the directors of agricultural societies have delivered more than 6000 lectures and made nearly 20,000 visits to private firms.

have delivered more than 6000 lectures and made nearly 20,000 visits to private firms.

The oldest documents existing in the Italian state archives and libraries establishing the beginnings of the Italian language and differing from the idiomatic Latin used during so many centuries throughout many parts of the ancient Roman Empire, belonged to the second half of the tenth century, and exactly to the years 963 and 964. These years have been commonly regarded as marking the origin of the Italian language, which is supposed to have been spoken by the inhabitants of the

Italian peninsula for nearly \1000 years. Signor Alfonso Gallo, a professor of the University of Rome, has now discovered in the famous archives of Monte Cassino, a small town situated halfway between Rome and Naples, a parehment document of the year 819, which adds negriy 150 years to the age of the Italian language. The professor will publish this document after completing his tradice on its but he age to the tradical control of the professor will publish this document after completing his studies on it, but he says that it is the oldest document in existence where some Italian expressions and phrases are used together with Latin words. The discovery is further important, as the newly found document is dated one year prior to the famous Benevento diploma of Grimaldo IV and which hitherto has been considered as the oldest document of the Monte Cassino Library.

With a view to freeing Italy from Anglo-Saxon pressure With a view to freeing Italy from Anglo-Saxon pressure on her supplies of essential raw materials, a strong group has been formed between Italian industrialists and capitalists to develop further importation of coal, naphtha, etc., from the Eastern countries, and especially from Soviet Russia. Negotiations are now in progress to obtain from the Soviet Government the privilege of exploiting exclusively certain mineral basins and to employ only Italian labor. The necessary capital for this big exploitation-scheme will be sought, it is believed, in the United States, and Italy will send workmen and technical experts to Russia, after obtaining for them guarantees of special safeguards. In return Italy will increase her supply to the Soviet of manufactured Italian products, especially transport material, thus compensating for the minerals imported from Russia.

The Definition of Intoxicating Liquor

To the Editor of THE CHRISTIAN SCIENCE MONITOR: I read some months ago that the liquor men themselves defined intoxicating liquor as that containing one-half of 1 per cent alcohol, and in this connection I am taking the liberty of quoting from a letter I have from Boyd P. Doty, assistant general manager of the Anti-Saloon League of America, as follows:

Saloon League of America, as follows:

The framers of the Volstead Act also found that back in 1803 the brewers were paying a government tax for the manufacture of intoxicating beer. The definition of intoxicating fluor at that time seems to have been fixed at 2 per cent or more. The manufacturers of this intoxicating beer were obliged to pay the tax, bu' they found that there were a number of so-called soft drink manufacturers who were manufacturing a beverage containing slightly under 2 per cent of alcohol and on which they were not compelled to pay a tax. The intoxicating beer manufacturers insisted that they could not pay the tax and compete with the so-called nonintoxicating beer manufacturers, who did not have to pay any tax, and the taxpaying groups insisted that the definition of intoxicating fluors should be fixed at one-half of 1 per cent or more alcohol. This was done by ruling of the Internal Revenue Department for the benefit of the beer manufacturers. They should not be heard, then, to complain now as to the same standard.

Mr. Doty quotes as his authority "Extracts of Hearings

complain now as to the same standard.

Mr. Doty quotes as his authority "Extracts of Hearings Before the Committee of Judiciary, House of Representatives," of the Sixty-eighth Congress, running from April 21 to May 21, 1924, page 296.

Were the shoe on the other foot, the Association Opposed to Prohibition would see a lot of humor in this situation equal to their present horror of the wild expenditure by the League of \$35,000,000 (in thirty years) to "put over" prohibition. I read the other day that America's chewing gum bill for the last year was \$47,000,000. Buffalo, N. Y.

The Facts About Mexico

To the Editor of THE CHRISTIAN SCIENCE MONITOR

I desire to express to you'the appreciation we have for the manner in which you have given your readers the information regarding affairs to Mexico at the present time. We do not seem to get such exact details from any other source, and therefore I feel it not out of place to let you know how eagerly we look for your article every evening. Your paper is full of good things, and we can read it teday or a month hence and still find something, interesting in it. Keep up the good work.

D. H. B. Boston, Mass.
